OVERVIEW

A complete CRM inside Google Sheets

CRM Pro helps a sales or service team capture every lead, follow up on time, convert leads into customers and handle complaints, all from one login-secured dashboard. It runs on Google Sheets and Apps Script, so there is no new software to install and no monthly licence. Your data stays in your own Google account.

No new software
Opens in any browser and works on mobile. Nothing to install.

Nothing slips through
Every follow-up is saved with date, outcome and the next date.

See the whole pipeline
KPIs, charts and filters show where every lead stands.

Secure by design
User ID and password login. Users see only their own leads.

Your data, your account
Everything lives in your own Google Sheet.

Easy to extend
Custom fields, branding and reminders can be added on request.

How it works

Add a lead → **Log follow-ups** → **Convert to customer** → **Track on dashboard**

Tickets run alongside this flow so that after-sales complaints are tracked until they are resolved.

Who is it for

- Sales teams and business owners who track enquiries on paper, WhatsApp or scattered sheets.
- Dealers, distributors and traders who follow up with many customers every week.
- Customer relationship and service teams who need complaints and follow-ups in one place.

SECTION-WISE BRIEFING

What is inside the module

1 Login and Security

Available in: All plans (multi-user roles in Professional and Custom)

Every person signs in with a User ID and password before the CRM opens.

- Passwords are stored as secure hashes, never as plain text
- 5 wrong attempts lock the User ID for 10 minutes; sessions expire after 6 hours
- Admin sees everything; a User sees only their own leads
- Your company name appears on the login page and sidebar

Sample screen: login page

Who can see and do what

Capability	Admin	User
See all leads and follow-ups	✓	Own leads only
Dashboard and KPIs	Whole team	Own data only
Add and edit leads, log follow-ups	✓	✓
Delete records	✓	–
Add users and reset passwords	✓	–
Change the company name	✓	–

Role-based access is part of the Professional and Custom plans. Starter includes a single admin login.

Built-in safeguards

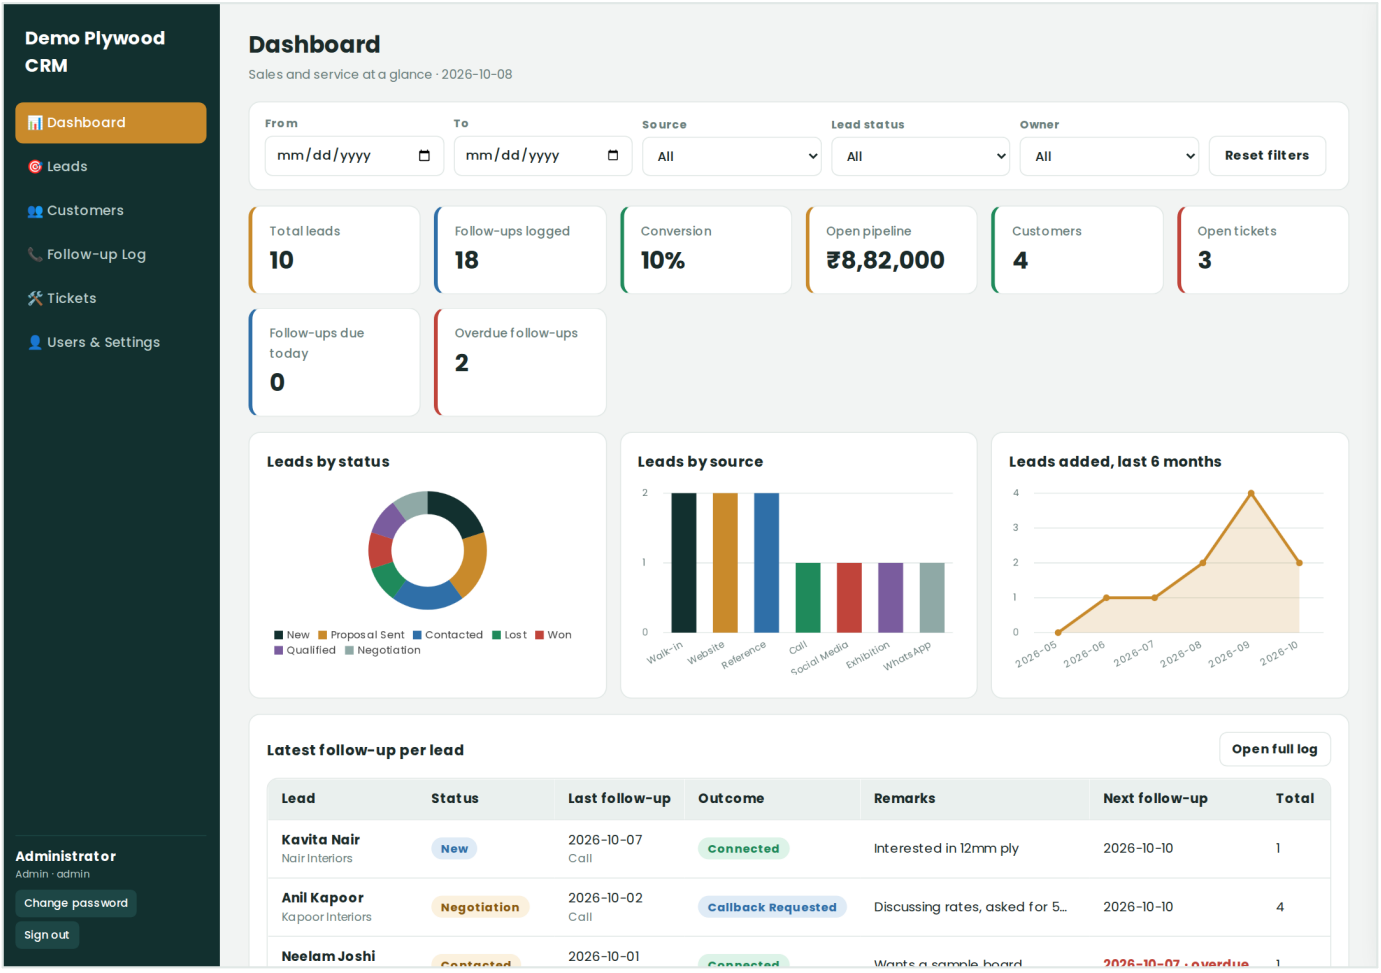

- Secure password hashing, with no passwords stored in readable form.
- Temporary lock after repeated wrong passwords, and automatic session expiry.
- Default admin password must be changed on first sign-in.
- Every request is checked for login and role before any data is returned.

2 Dashboard

Available in: All plans (advanced filters in Professional and Custom)

A one-screen view of sales performance and follow-up discipline.

Sample screen with demo data: Dashboard with filters, KPIs, charts and latest follow-ups

- 8 live KPIs: leads, follow-ups, conversion, open pipeline, customers, tickets, due today, overdue
- 3 charts: leads by status, by source and added over the last 6 months
- Filters by date range, source, status and owner update everything instantly
- Latest follow-up per lead, with overdue dates in red

Questions the dashboard answers in seconds

Who needs a call today?

Due-today and overdue follow-ups are counted and highlighted.

Where is the pipeline stuck?

Leads by status and open pipeline value show the bottlenecks.

Which source works best?

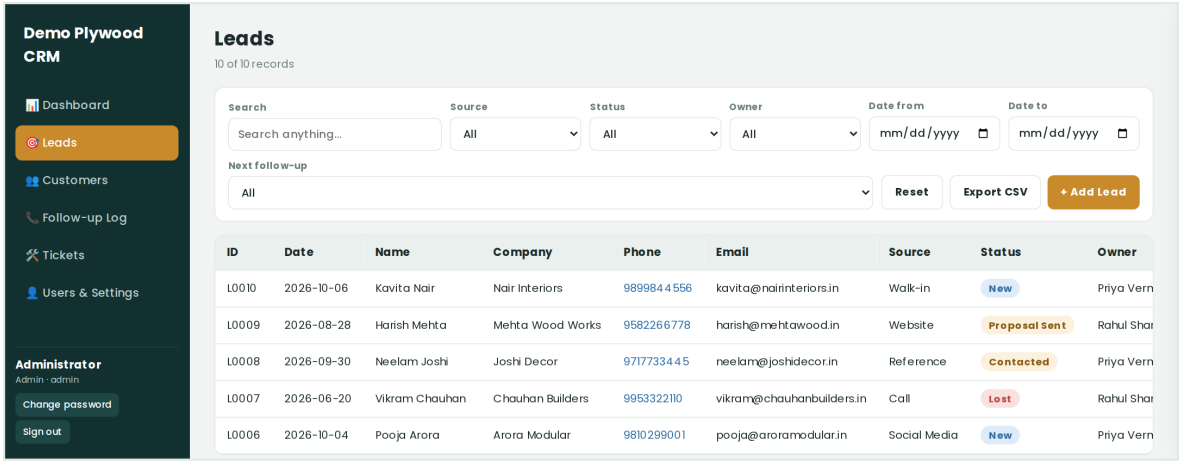

Leads by source and the conversion rate show what to invest in.

3 Leads

Available in: All plans

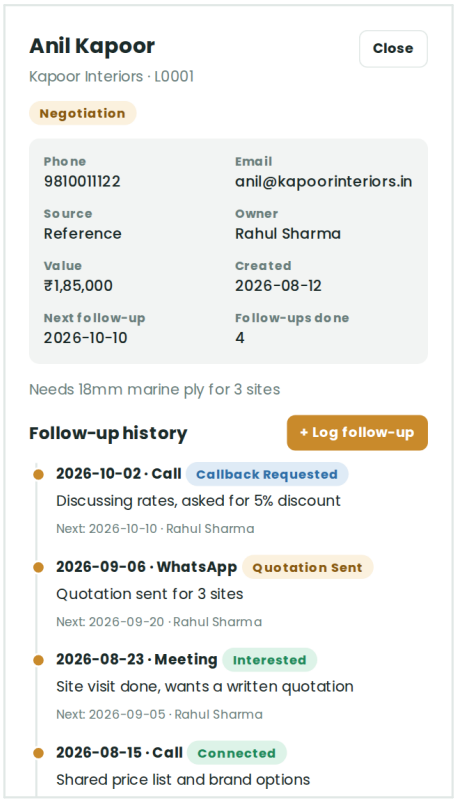

The home of every enquiry, from first contact to a closed deal.

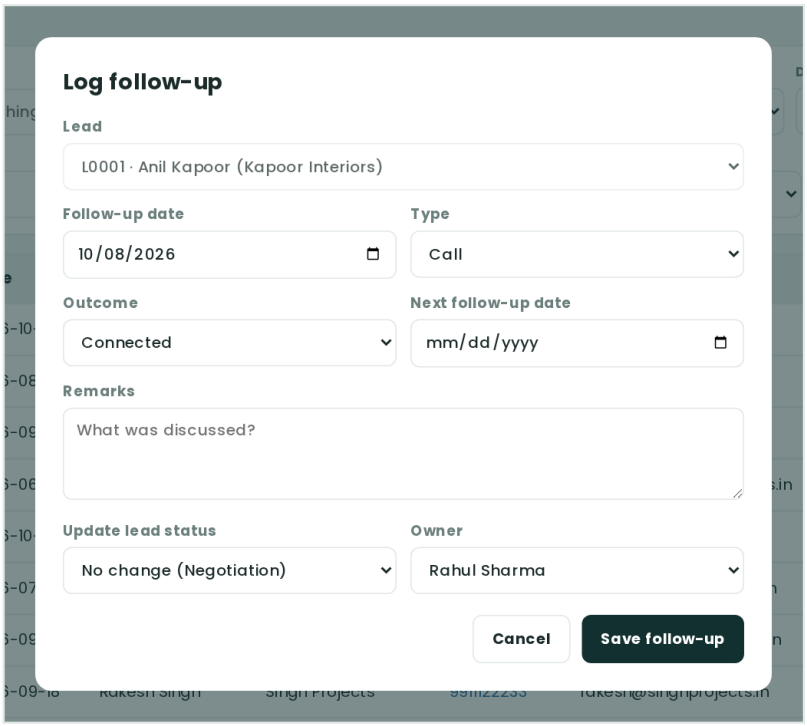

Sample screen with demo data: Leads list with search and filters

- Captures contact details, source, status, owner, expected value and notes
- Duplicate protection warns when the same phone number already exists
- One-click conversion of a won lead into a customer
- Search, filters, sorting and CSV export (Professional and Custom)

Inside a lead

Lead profile with the full follow-up timeline

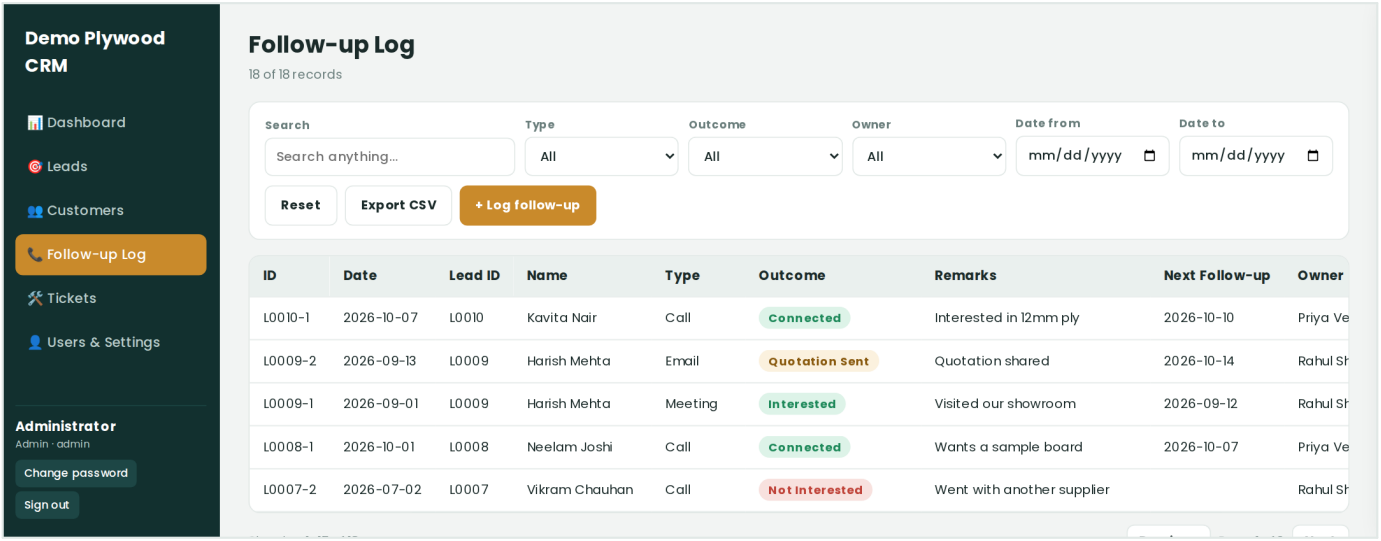

Log follow-up form: type, outcome, remarks, next date and status

4 Follow-up Log

Available in: All plans

The full history of every call, message and visit, saved lead by lead.

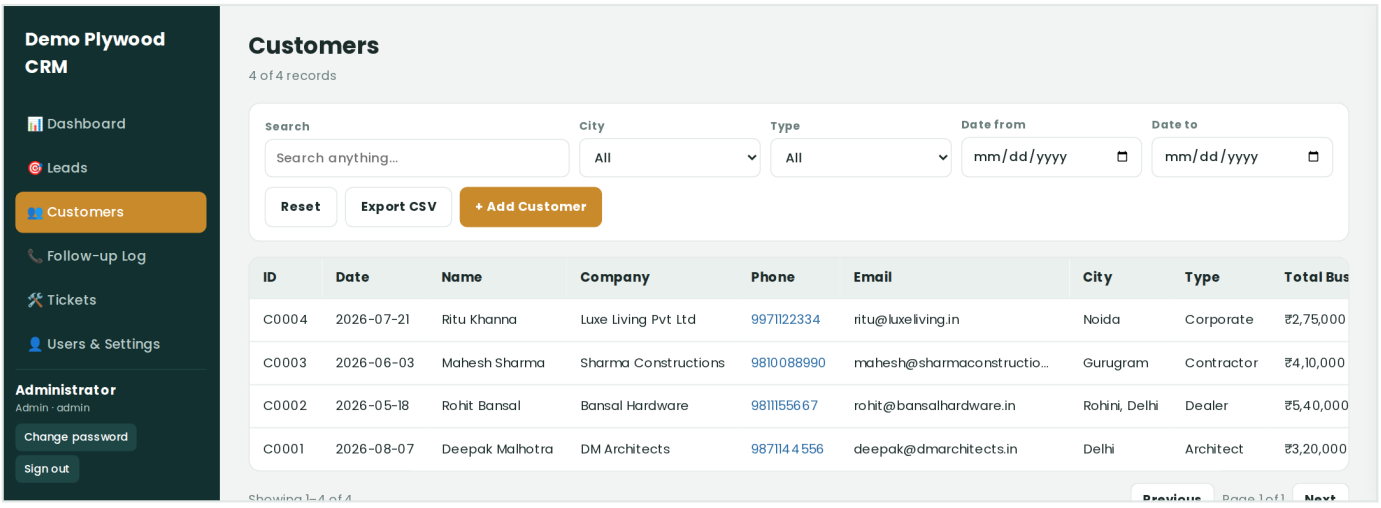

Sample screen with demo data: Follow-up Log

- One lead, one ID: follow-ups are numbered L0001-1, L0001-2, L0001-3 and so on
- Records type, outcome, remarks and the next follow-up date
- The lead always shows its last and next follow-up automatically
- Filter the log by type, outcome, owner and date

5 Customers

Available in: All plans

A clean list of the people and companies you have won.

Sample screen with demo data: Customers

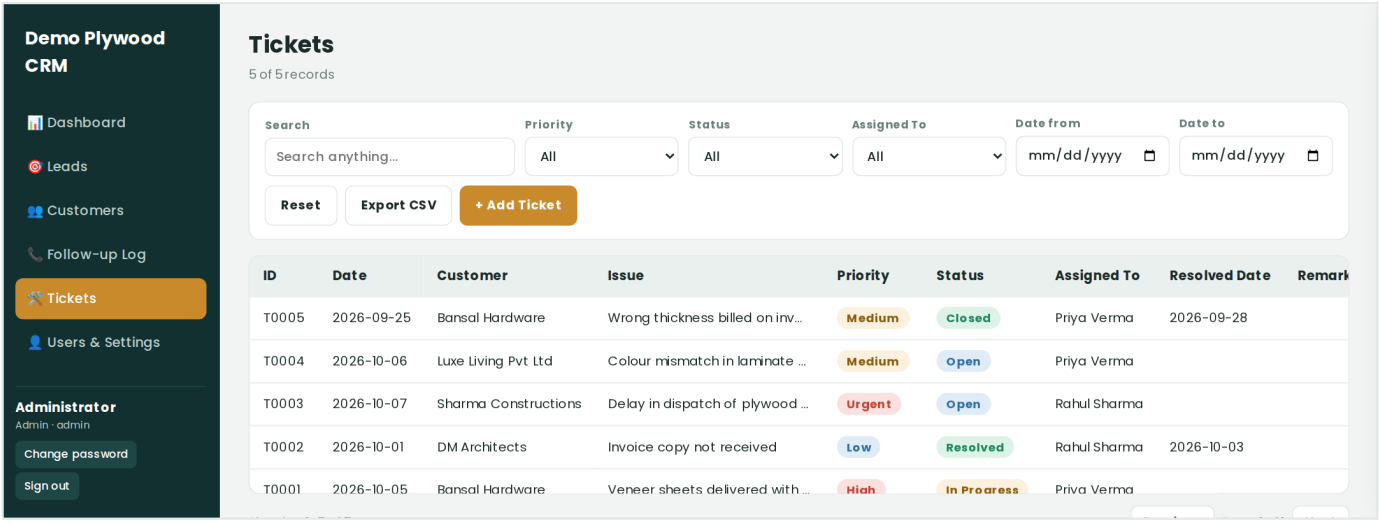

- Stores contact details, city, customer type and total business
- Types: Retail, Dealer, Contractor, Architect, Corporate
- Customers converted from leads keep a reference to the lead
- Search, filters and CSV export (Professional and Custom)

6 Tickets

Available in: Professional and Custom

Keeps complaints and service requests from getting lost.

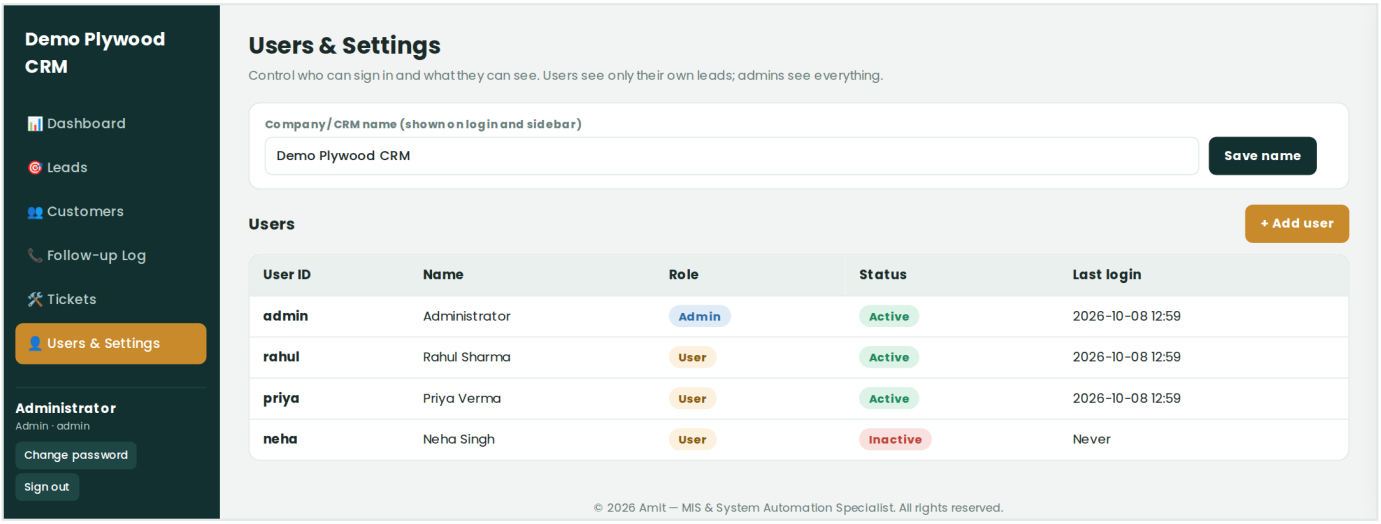

Sample screen with demo data: Tickets

- Records customer, issue, priority (Low to Urgent), status and assignee
- Statuses: Open, In Progress, Resolved, Closed
- Open tickets are counted on the dashboard
- Filter by priority, status, assignee and date

7 Users and Settings

Available in: Professional and Custom

Admin controls who can sign in and what the CRM is called.

Sample screen with demo data: Users and Settings (admin only)

- Add users, set role, activate or deactivate, and reset passwords
- Set the company name shown across the CRM
- Only admins can delete records or manage users
- Each user gets their own User ID and password

GETTING STARTED

From requirement to go-live

1
Share your requirement
Tell us your lead sources, statuses and team size.

2
Setup and live demo
We build it in your Google Sheet and walk you through a live demo.

3
Go live
Users get their User ID and password and can start adding leads the same day.

What we need from you

- Your lead sources (for example website, walk-in, reference, call, WhatsApp).
- Your lead stages from first contact to won or lost.
- The names of your team members and who should be an admin.
- Your company name, and any extra fields or reports you want.

Ready to see it in action?

Ask for a live demo of CRM Pro and see your own leads, follow-ups and dashboard working together.
