EXECUTIVE SUMMARY

What Chalan Pro does for your business

Chalan Pro replaces paper challans, scattered spreadsheets and missed follow-ups with one system. It creates a professional challan, emails the PDF, tracks returnable goods, alerts you when returns are due, and gives management a live dashboard.

Dispatch in one minute

Searchable party, vehicle, driver and item masters. Pick, add quantity, save. The PDF is created and emailed.

Returnable goods tracked

Expected return dates, return status, overdue alerts and a receipt mail when goods come back.

Live MIS dashboard

Counts, amounts, trends, top parties and alerts on one screen, updated on every visit.

Control and audit

Admin and User roles, hashed passwords, session expiry and a full audit trail of every action.

Your brand, your colours

Logo, company details, eight colour presets or a custom colour, and dark mode, all from Settings.

No hosting, no installation

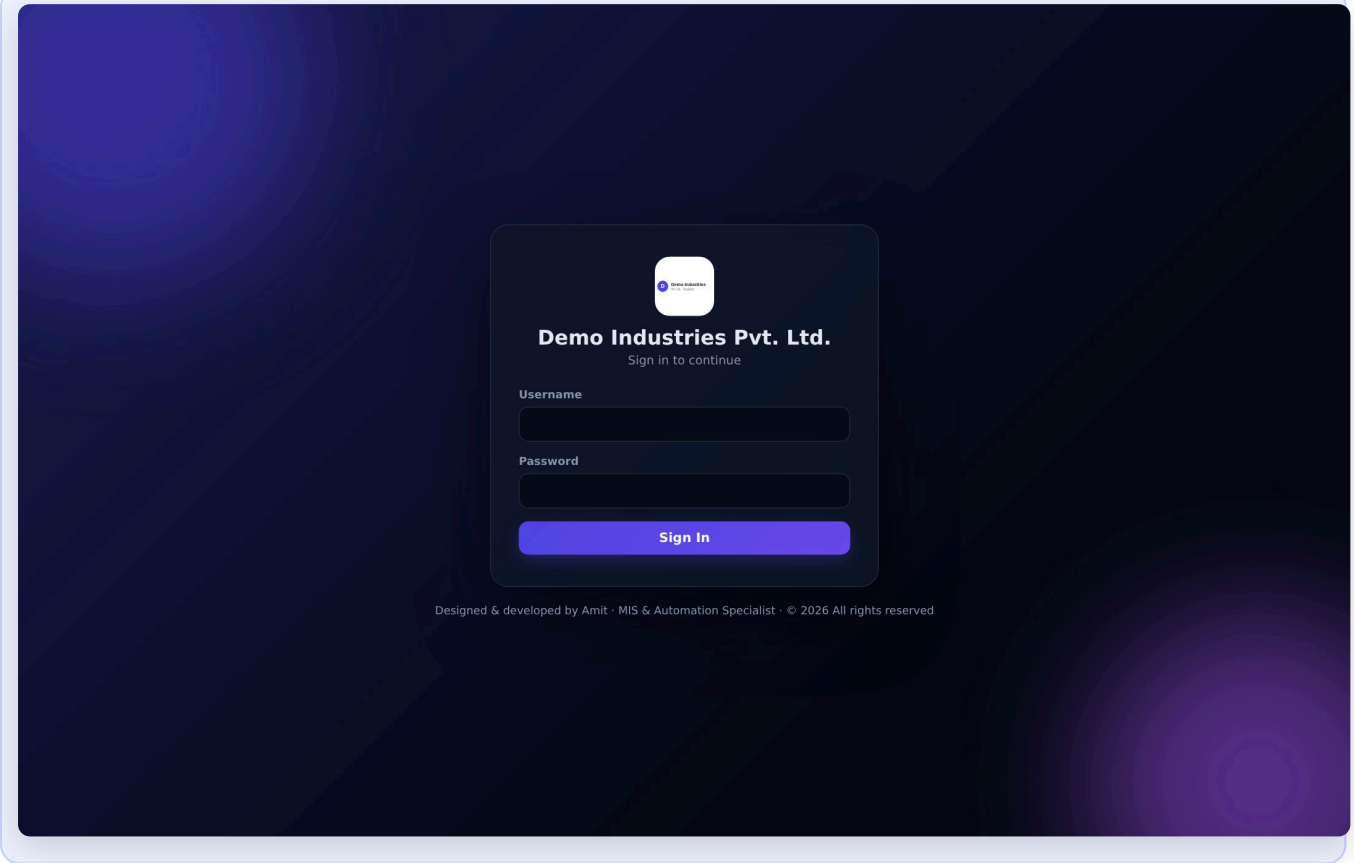

Runs on Google Sheets and Apps Script in any browser. Data stays in the client's own Google account.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 01

Secure sign-in and first-time setup

The first launch creates the Administrator account. After that every person signs in with their own username and password.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Admin creates users and chooses their role (Admin or User).
- Passwords are stored as salted hashes, never in plain text.
- Sessions expire automatically after inactivity.

HOW TO USE IT

1. Open the Chalan Pro link on any browser.
2. Enter the username and password given by the Admin.
3. Admin creates the other users from the Users page.

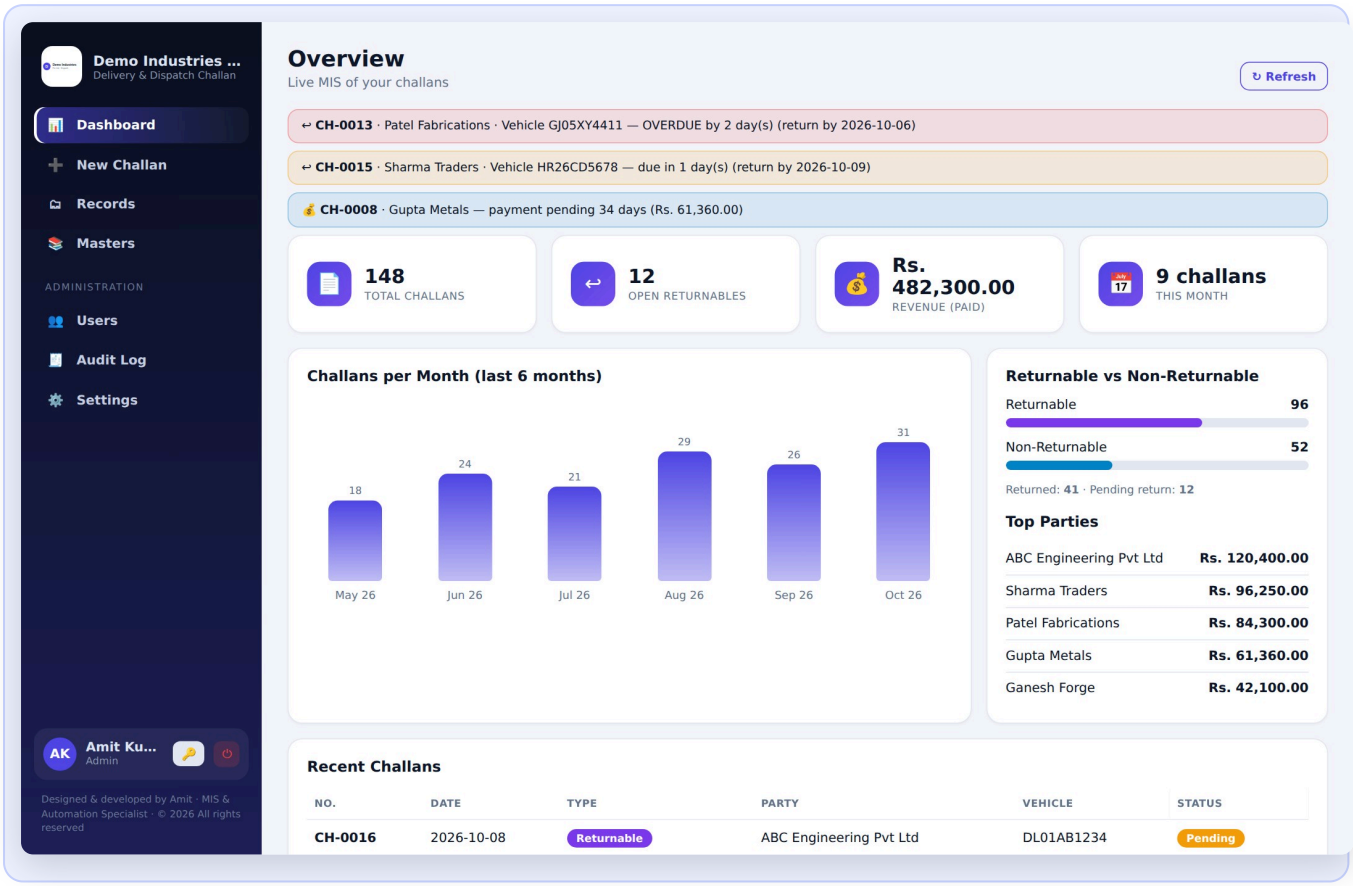

BUSINESS VALUE — Only authorised people can see party rates, vehicle and driver data.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 02

MIS dashboard

The owner's daily view. Alerts for overdue returns and pending payments sit at the top, followed by KPIs, a six-month trend, the returnable vs non-returnable split and top parties.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Red, amber and blue banners show what needs action today.
- KPI cards: total challans, open returnables, paid revenue and this month.
- Charts and recent challans update every time the screen is opened.

HOW TO USE IT

1. Check the red and amber alerts first.
2. Review KPIs, monthly trend and top parties.
3. Open Records to act on any overdue item.

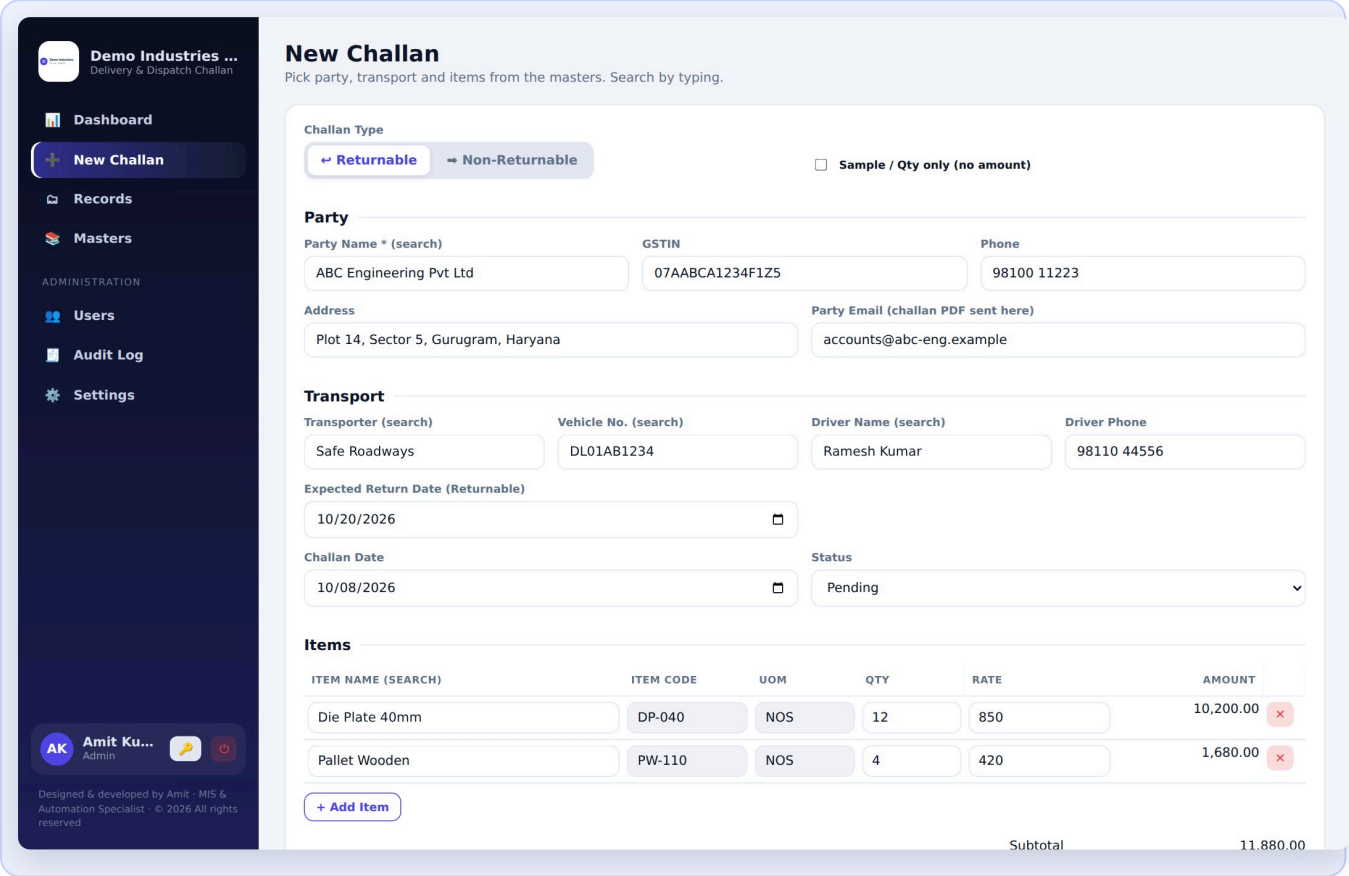

BUSINESS VALUE Management sees the position in seconds instead of waiting for month-end reports.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 03

New challan (returnable)

Choose the challan type, then pick party, transporter, vehicle and driver from the masters. Expected return date is required for returnable goods.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Returnable and Non-Returnable buttons switch the form.
- Party selection fills address, GSTIN, phone and email automatically.
- Vehicle and driver selection fills transporter and driver phone.

HOW TO USE IT

1. Select Returnable and pick the party from the list.
2. Pick transporter, vehicle and driver; details fill in.
3. Enter the expected return date and save.

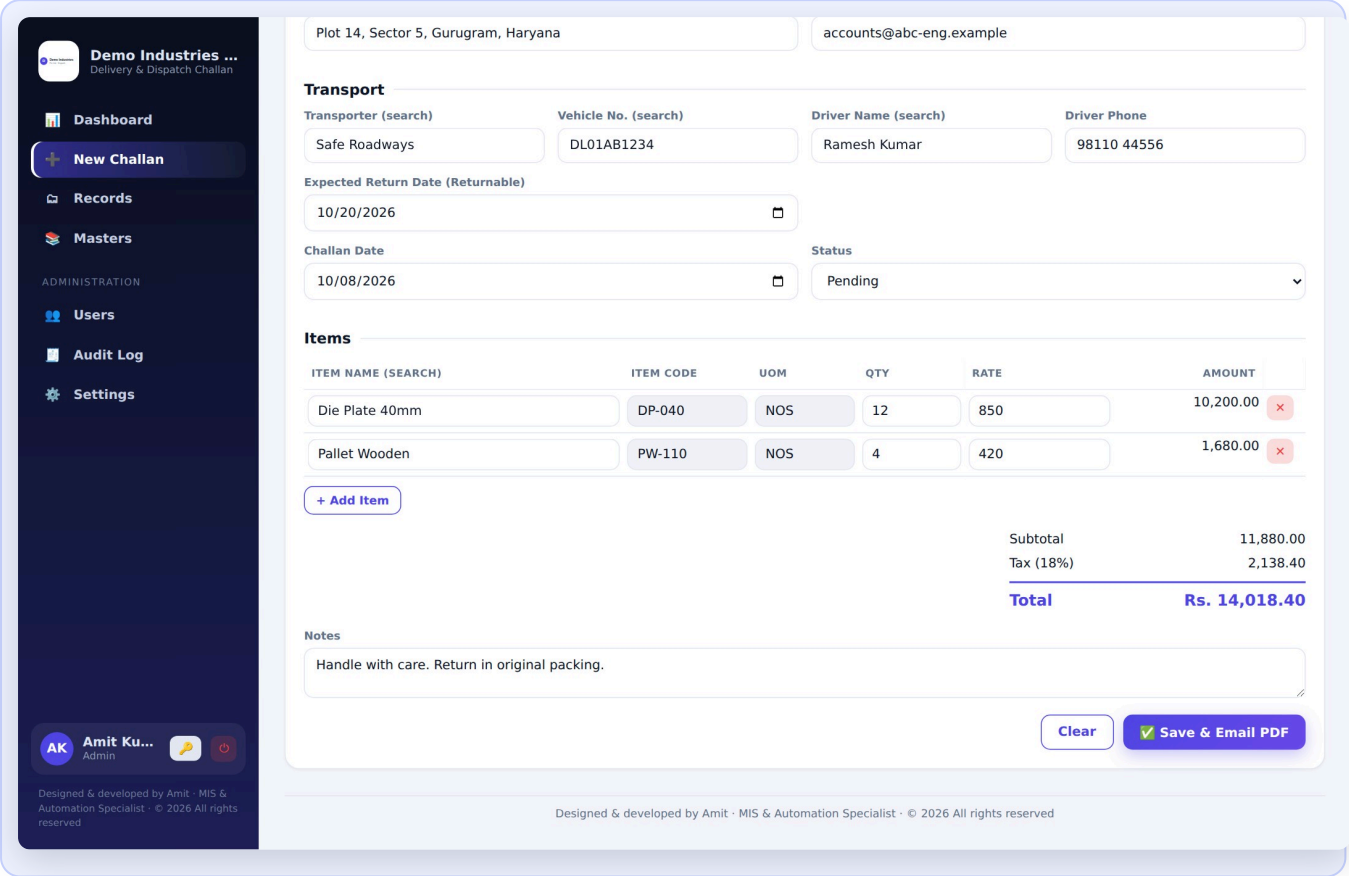

BUSINESS VALUE Less retyping means fewer mistakes on the challan and on the gate register.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 03

New challan: items and totals

Items come from the item master, so code and unit of measure print the same way every time. Tax and totals update as quantities change.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Item name, code and UOM are picked from the master.
- Quantity and rate are entered per line; amount is calculated.
- Tax percentage comes from Settings, so it changes in one place.

HOW TO USE IT

1. Search the item by name or code.
2. Enter quantity and rate for each line.
3. Check subtotal, tax and total before saving.

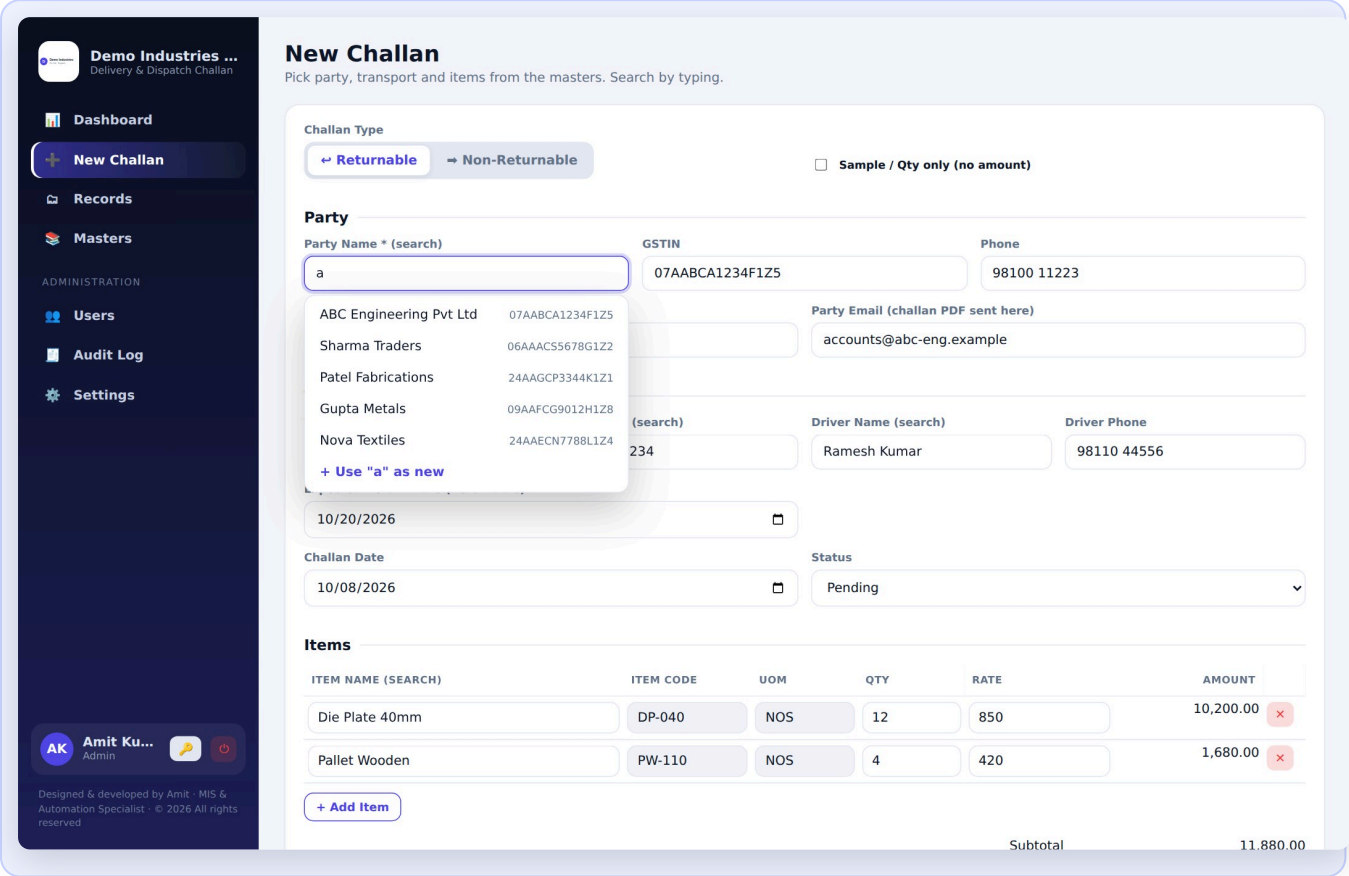

BUSINESS VALUE — Consistent item data across all challans and reports.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 04

Searchable dropdowns

Every master field works as a searchable list. Type a few letters and matching records appear. Use the mouse, the scroll wheel, or the arrow keys and Enter.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- The list floats above the form, so nothing gets cut off.
- Names not in the master can still be typed and used with Enter.
- Works the same for parties, transporters, vehicles, drivers and items.

HOW TO USE IT

1. Click the field and start typing.
2. Move with arrow keys and press Enter, or click a name.
3. Type a new name and press Enter if it is not listed.

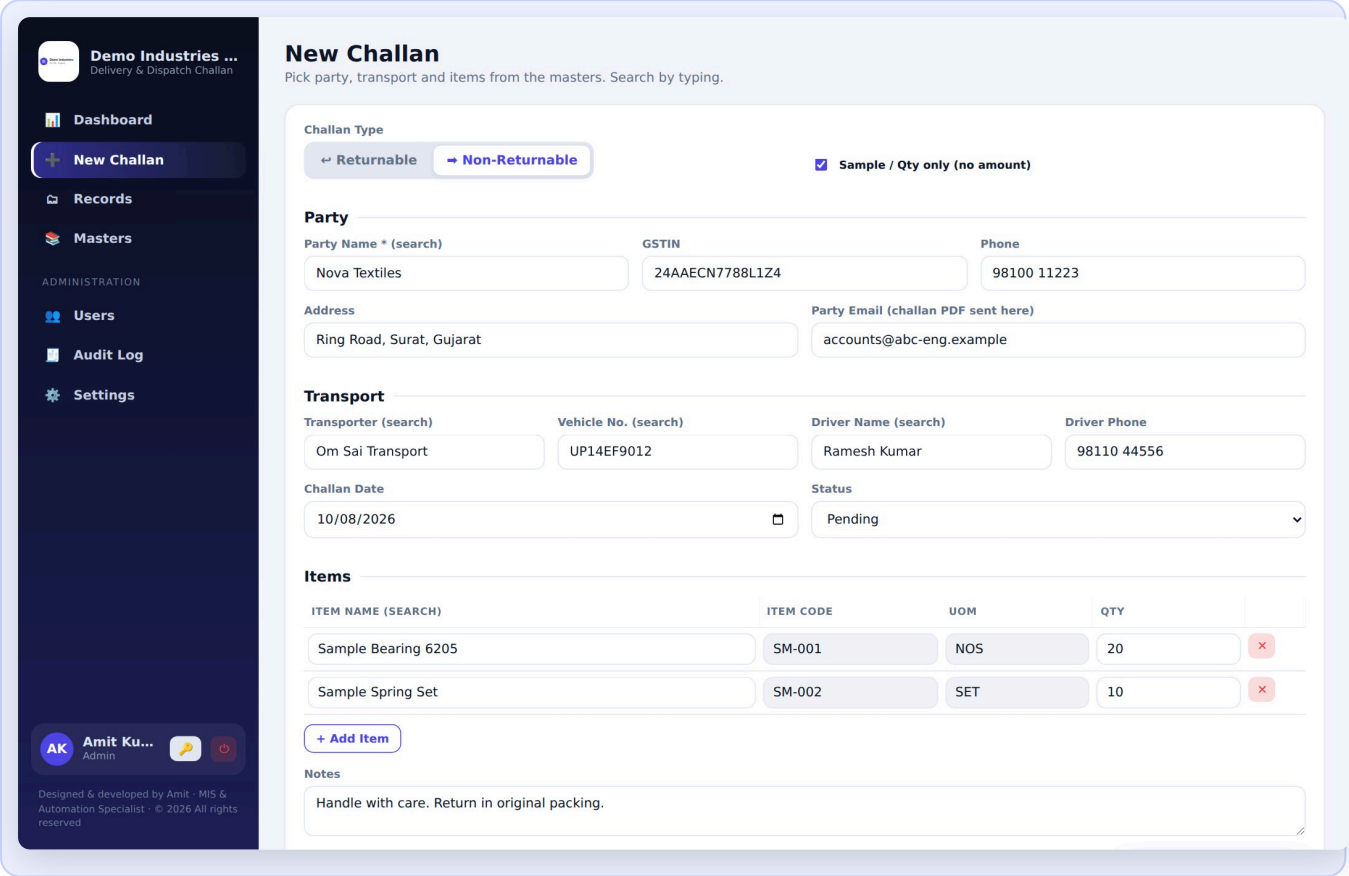

BUSINESS VALUE Fast data entry even on a long party or item list.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 05

Sample / quantity-only challan

For sample dispatch, job-work or quality checks where value is not needed. Tick the box and the rate, amount and tax columns disappear.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Only item name, code, UOM and quantity are shown and printed.
- Totals and tax are hidden, so there is no confusion about value.
- Works with both Returnable and Non-Returnable challans.

HOW TO USE IT

1. Tick Sample / Qty only.
2. Enter item and quantity; no rate is needed.
3. Save. The PDF shows quantities only.

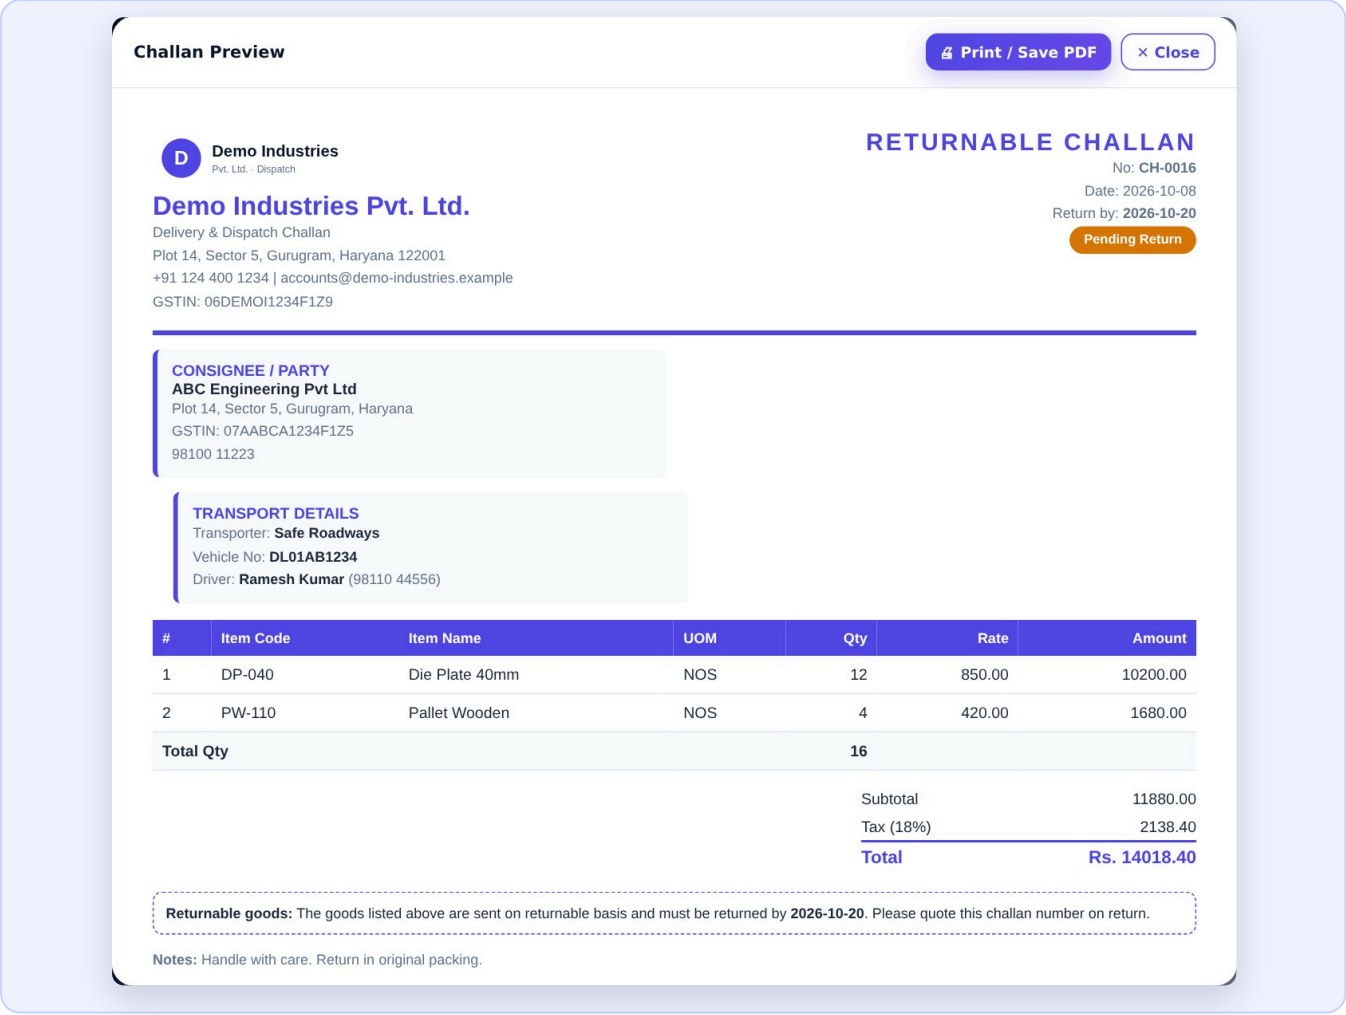

BUSINESS VALUE — Clean sample dispatch records without mixing them with billing data.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 06

Professional challan PDF

The document the party receives by email and the driver carries. It uses your logo, colour and company details, and includes a return note for returnable goods.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Consignee and transport details are printed in clear blocks.
- Signature lines for dispatch and receiving, plus copyright footer.
- Created automatically on save and emailed to the party.

HOW TO USE IT

1. Save the challan.
2. The PDF is emailed to the party automatically.
3. Preview, print or resend it from Records.

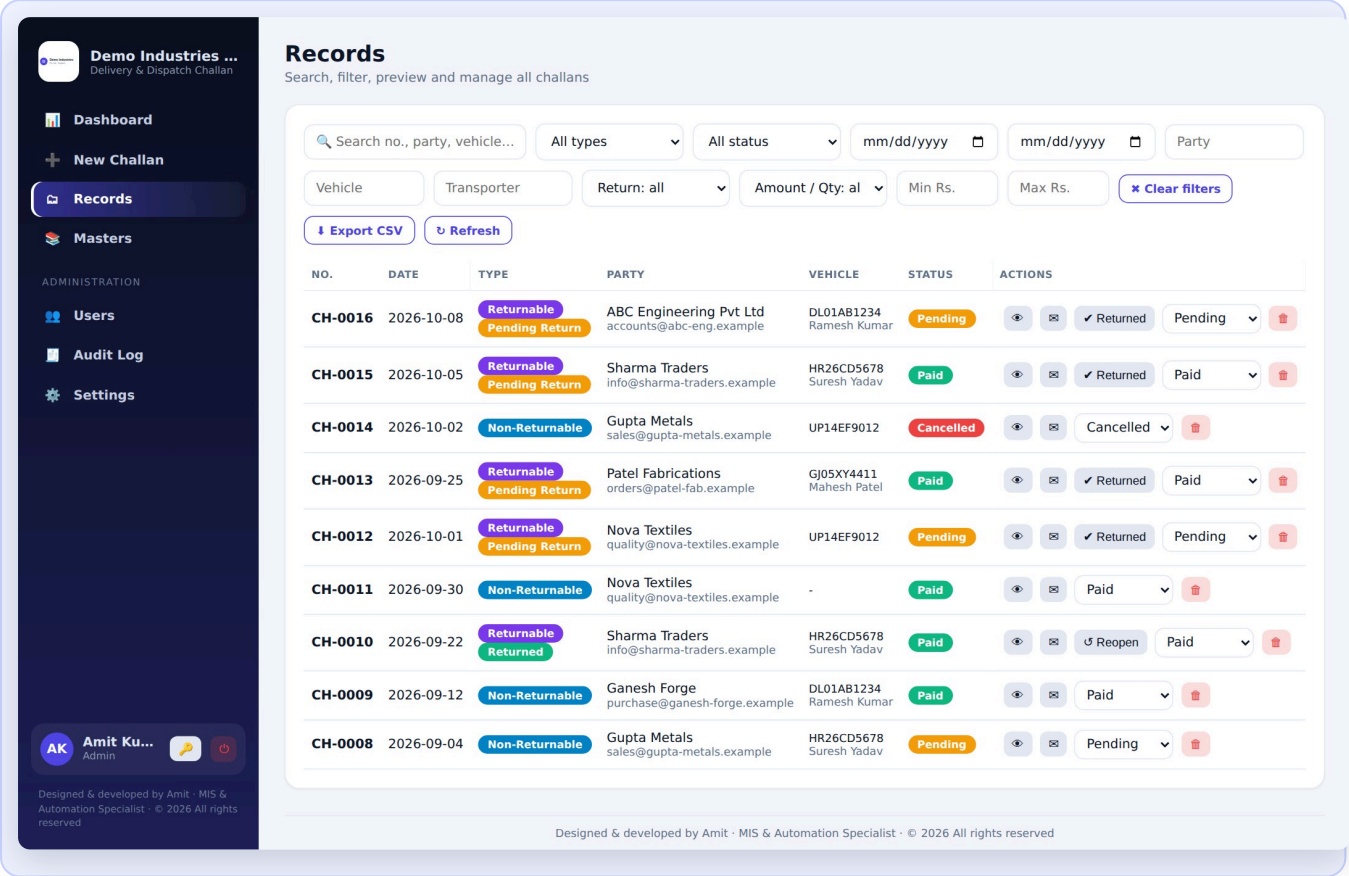

BUSINESS VALUE Looks professional to customers and gives a complete record for audits.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 07

Records register

A searchable register of every challan with status, return status and quick actions: preview, email again, mark returned, change status and delete (Admin).

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Preview opens the challan exactly as the party will receive it.
- Mark returned sends the return receipt mail automatically.
- Status can be changed from the same row.

HOW TO USE IT

1. Find a challan with the search box.
2. Preview, resend email or change status from the row.
3. Mark returnable goods as Returned when they come back.

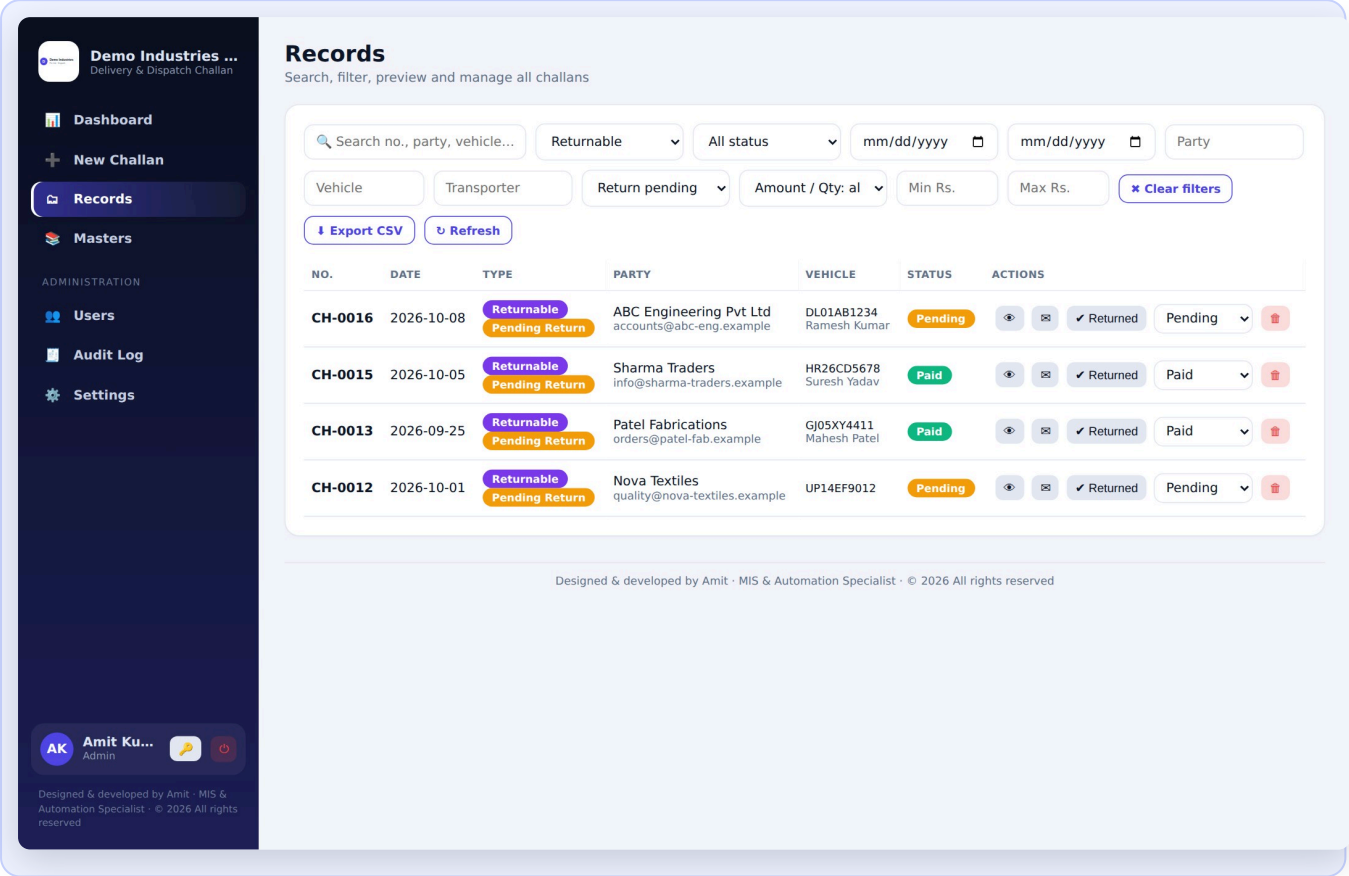

BUSINESS VALUE One place to see every dispatch and its current state.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 08

Filters and CSV export

Filters stack together: search text, type, status, return status, qty or amount, date range, party, vehicle, transporter and amount range.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Example shown: only returnable challans with pending returns.
- Clear filters resets everything in one click.
- Export CSV gives exactly the rows on screen, ready for Excel.

HOW TO USE IT

1. Set type, status and date range.
2. Add party, vehicle or amount filters.
3. Export the result to CSV for Excel.

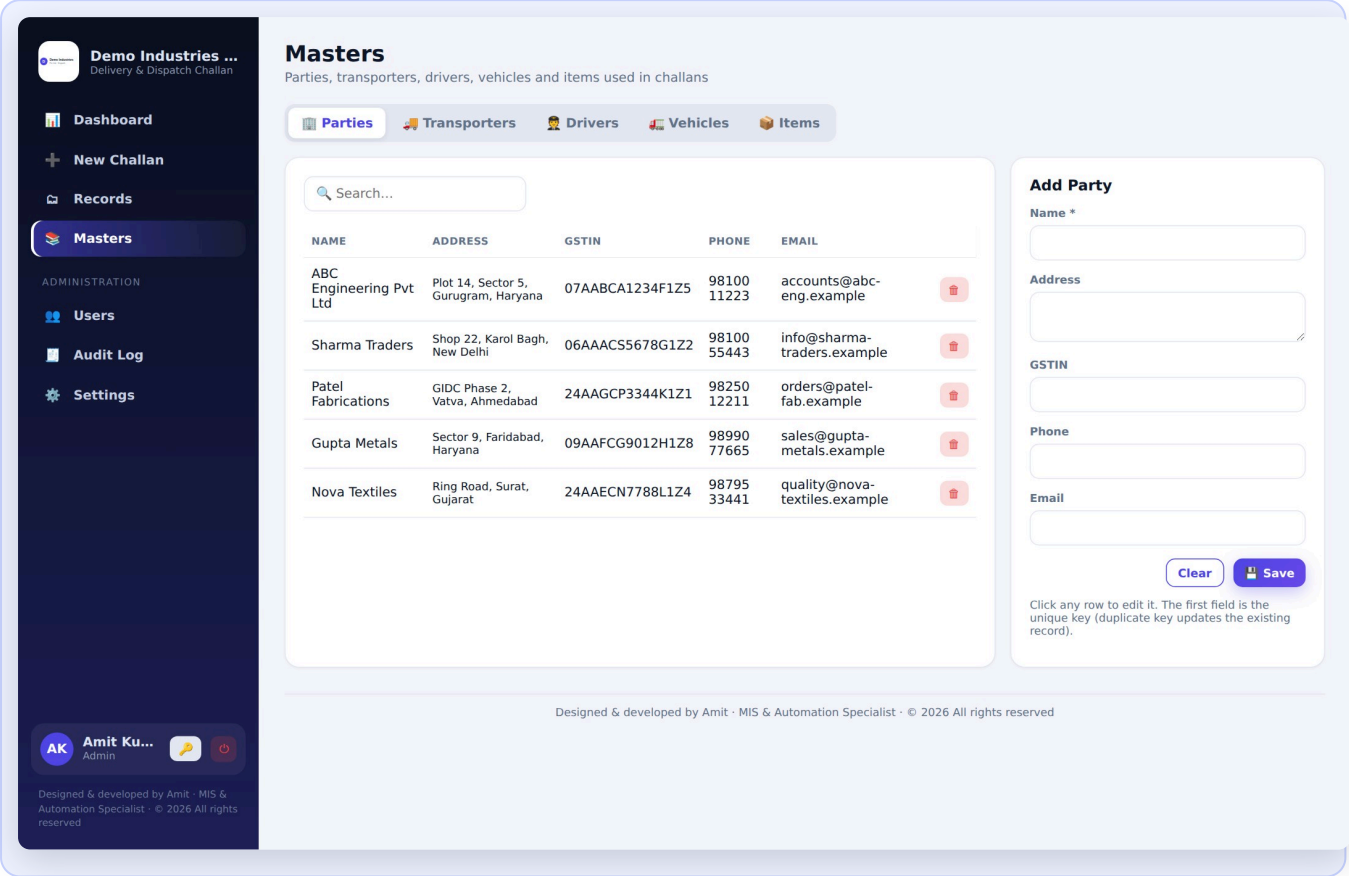

BUSINESS VALUE — Answers questions like "what is still out with Patel Fabrications" in seconds.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 09

Masters: parties

Enter each party once with address, GSTIN, phone and email. Click any row to edit it. The first field is the unique key.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Party master feeds the challan form and the PDF.
- Edits are logged in the audit trail.
- Only Admins can delete records.

HOW TO USE IT

1. Click any party row to edit it.
2. Or fill the form for a new party; the name is the key.
3. Save. It is available in the challan form at once.

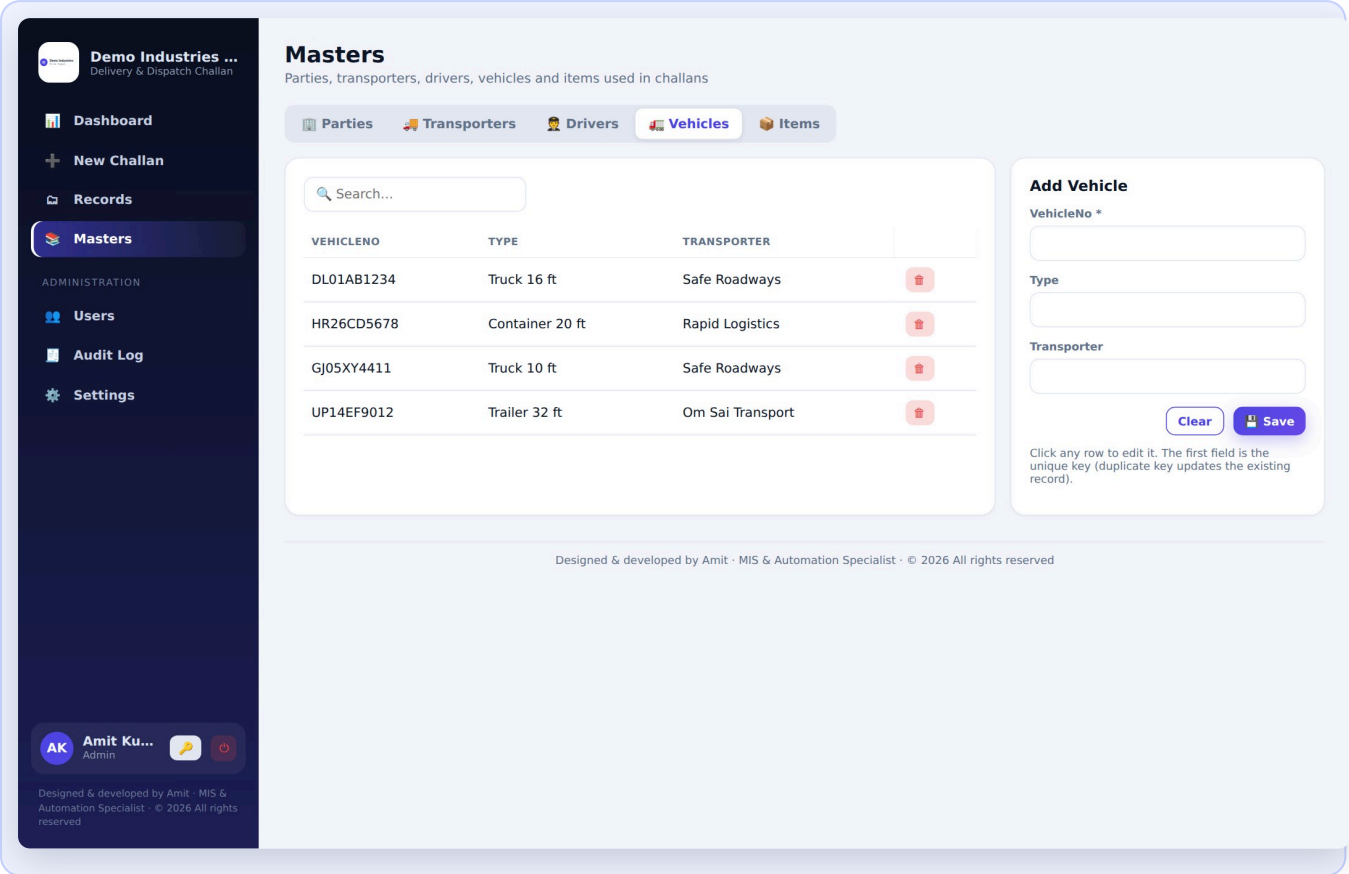

BUSINESS VALUE Clean, de-duplicated customer data that improves every challan.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 10

Masters: vehicles, drivers, transporters and items

The same master pattern is used for transporters, drivers, vehicles and items (code, name, UOM).

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Vehicle linked to its transporter.
- Driver linked to transporter and licence number.
- Item code and UOM used on every challan line.

HOW TO USE IT

1. Choose the master tab you need.
2. Fill the fields and save.
3. The record is used automatically in new challans.

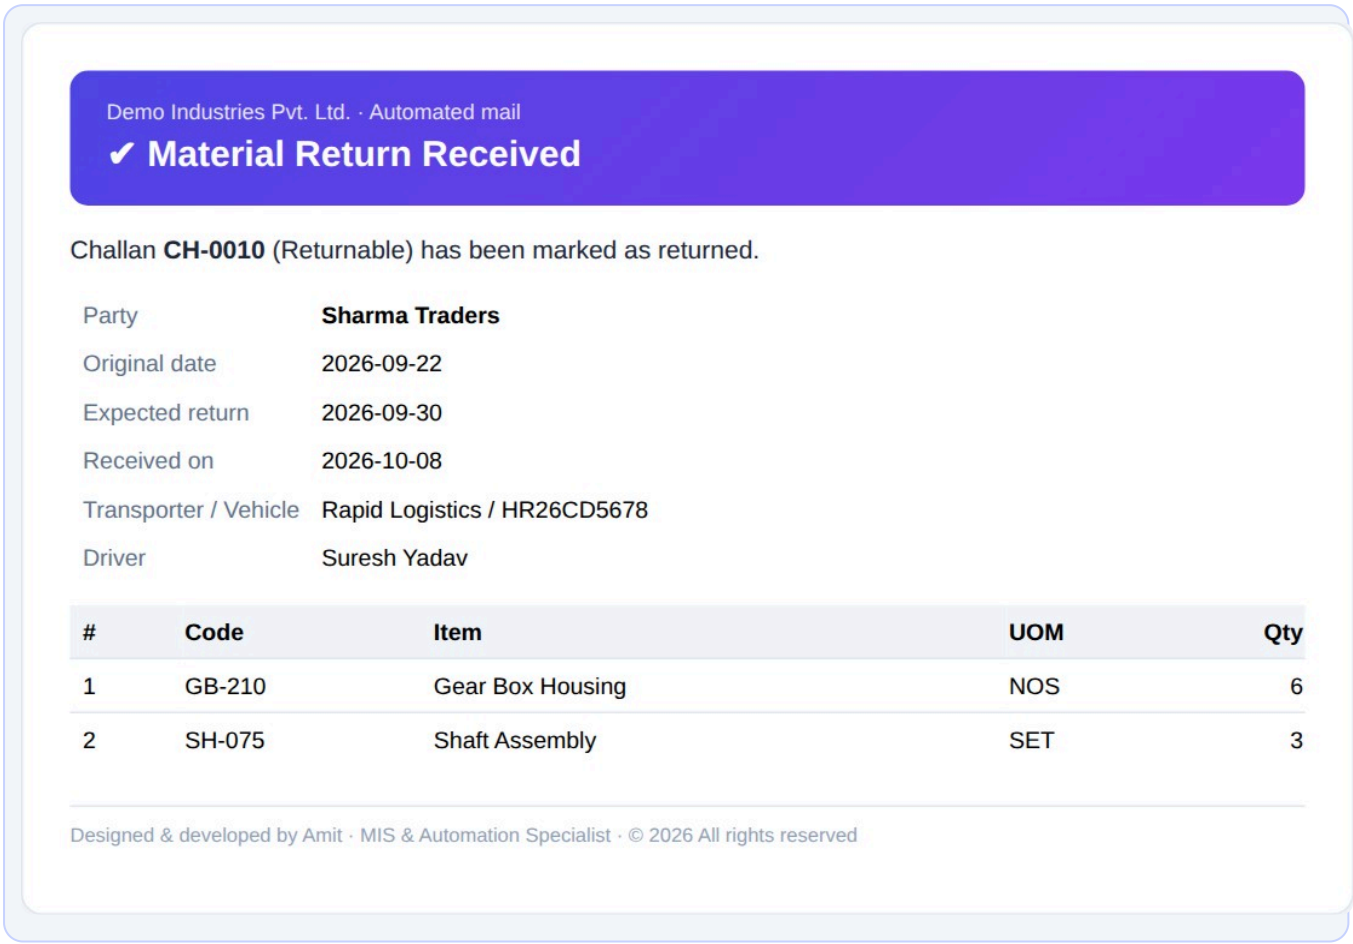

BUSINESS VALUE — Transport and item data entered once and reused everywhere.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 11

Automatic return-received mail

When a returnable challan is marked Returned, a receipt mail goes to your alert mailbox with the full item list and the return date.

Demo Industries Pvt. Ltd. · Automated mail

✔ Material Return Received

Challan **CH-0010** (Returnable) has been marked as returned.

Party	**Sharma Traders**
Original date	2026-09-22
Expected return	2026-09-30
Received on	2026-10-08
Transporter / Vehicle	Rapid Logistics / HR26CD5678
Driver	Suresh Yadav

#	Code	Item	UOM	Qty
1	GB-210	Gear Box Housing	NOS	6
2	SH-075	Shaft Assembly	SET	3

Designed & developed by Amit · MIS & Automation Specialist · © 2026 All rights reserved

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Sent to the Alert Mail ID set in Settings.
- Lists challan, party, vehicle, driver and returned items.
- Recorded in the audit log.

HOW TO USE IT

1. Mark the returnable challan as Returned.
2. The receipt mail goes to the Alert Mail ID.
3. The event is recorded in the audit log.

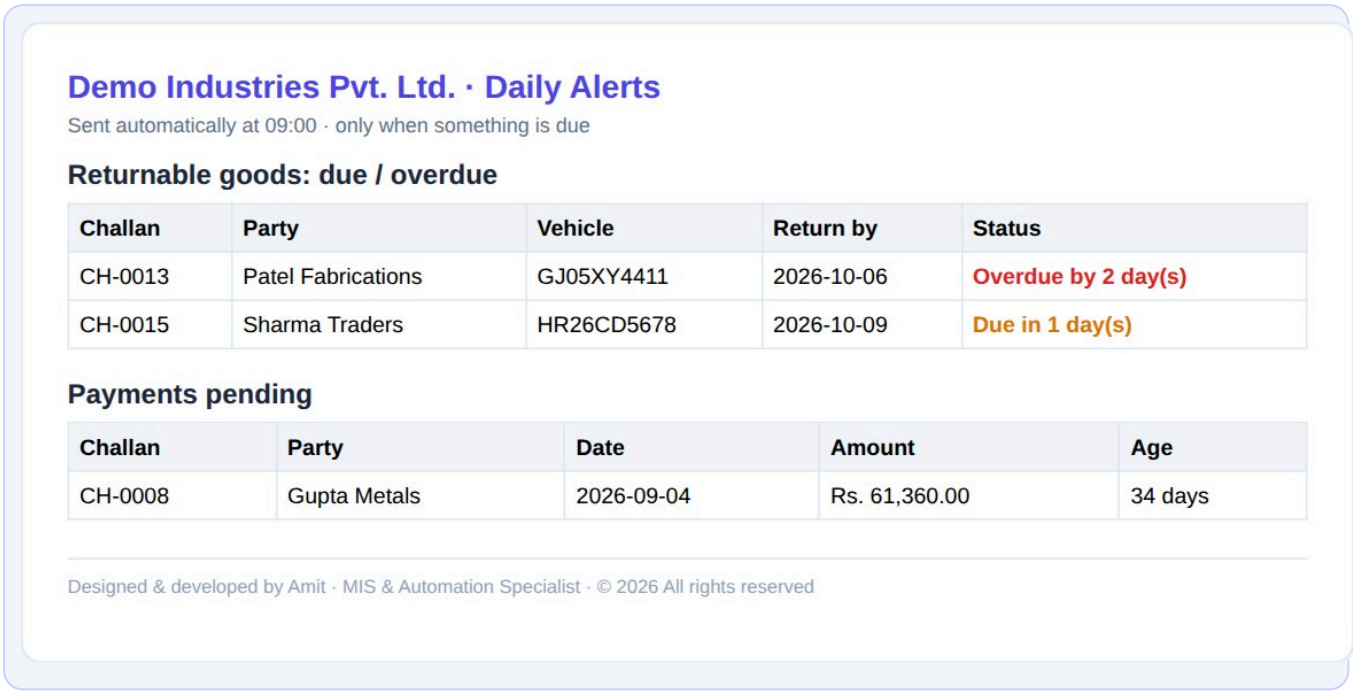

BUSINESS VALUE Proof of return for accounts and for the party, without any manual follow-up.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 12

Daily alert summary

Every morning at 9 AM the system checks returnable goods and pending payments. A summary is mailed only when something is due or overdue.

Demo Industries Pvt. Ltd. · Daily Alerts

Sent automatically at 09:00 · only when something is due

Returnable goods: due / overdue

Challan	Party	Vehicle	Return by	Status
CH-0013	Patel Fabrications	GJ05XY4411	2026-10-06	Overdue by 2 day(s)
CH-0015	Sharma Traders	HR26CD5678	2026-10-09	Due in 1 day(s)

Payments pending

Challan	Party	Date	Amount	Age
CH-0008	Gupta Metals	2026-09-04	Rs. 61,360.00	34 days

Designed & developed by Amit · MIS & Automation Specialist · © 2026 All rights reserved

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Returns due within the chosen number of days, and overdue returns.
- Payments pending beyond the chosen number of days.
- Dashboard shows the same alerts so nothing depends on email alone.

HOW TO USE IT

1. Enter the Alert Mail ID in Settings and save.
2. Click Enable daily alerts once.
3. Send a test alert to confirm delivery.

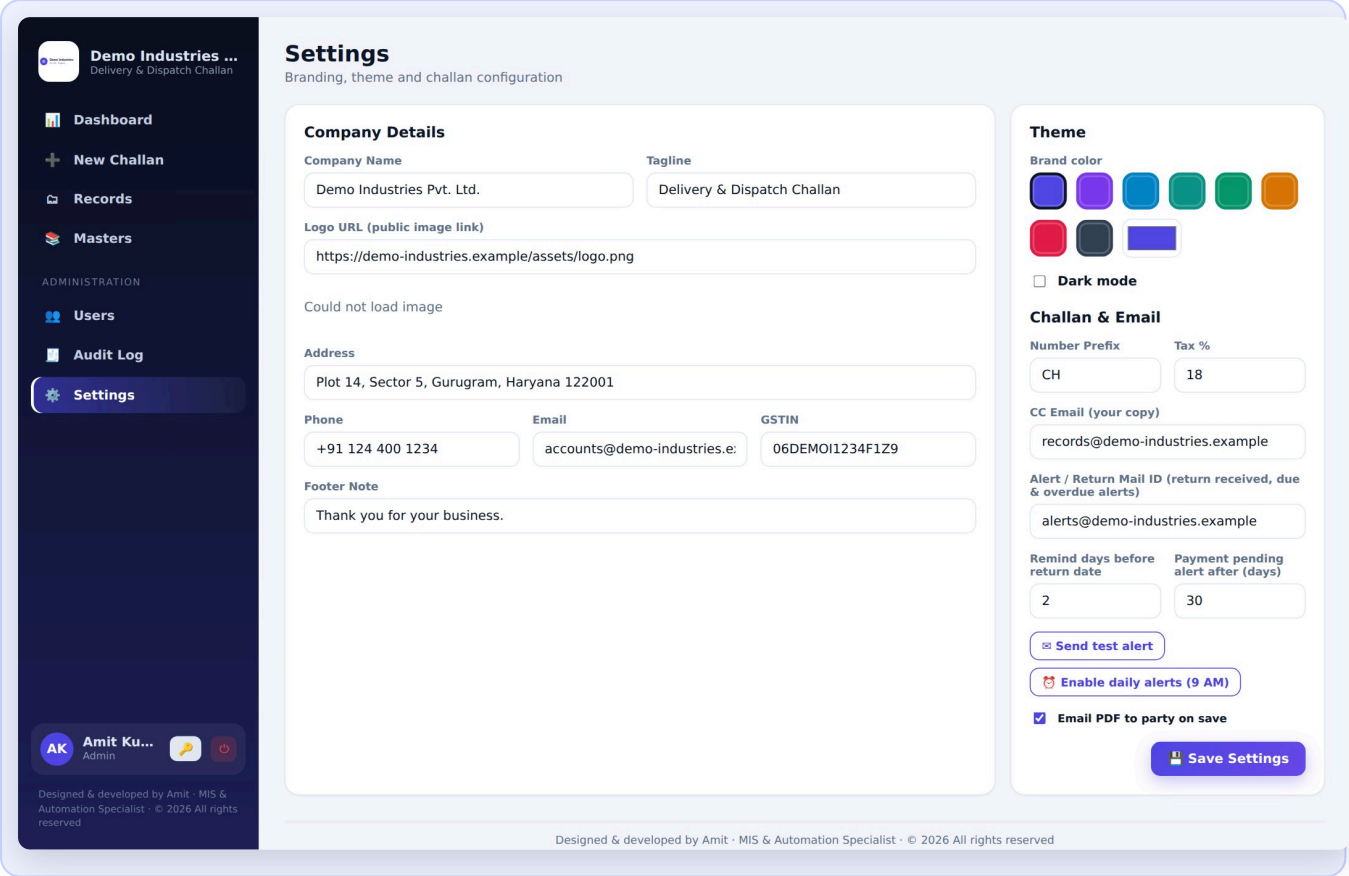

BUSINESS VALUE Nothing is forgotten. Overdue material is chased the same day.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 13

Settings and branding

Admins control company details, logo, colour theme, dark mode, number prefix, tax percentage, email options and alert rules.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Logo is added with a public image link and shows in the app, PDF and mails.
- Eight colour presets or any custom colour.
- Alert mailbox, reminder days and test-mail button.

HOW TO USE IT

1. Enter company name, address and GSTIN.
2. Pick a brand colour and add the logo link.
3. Save. PDFs, mails and screens update together.

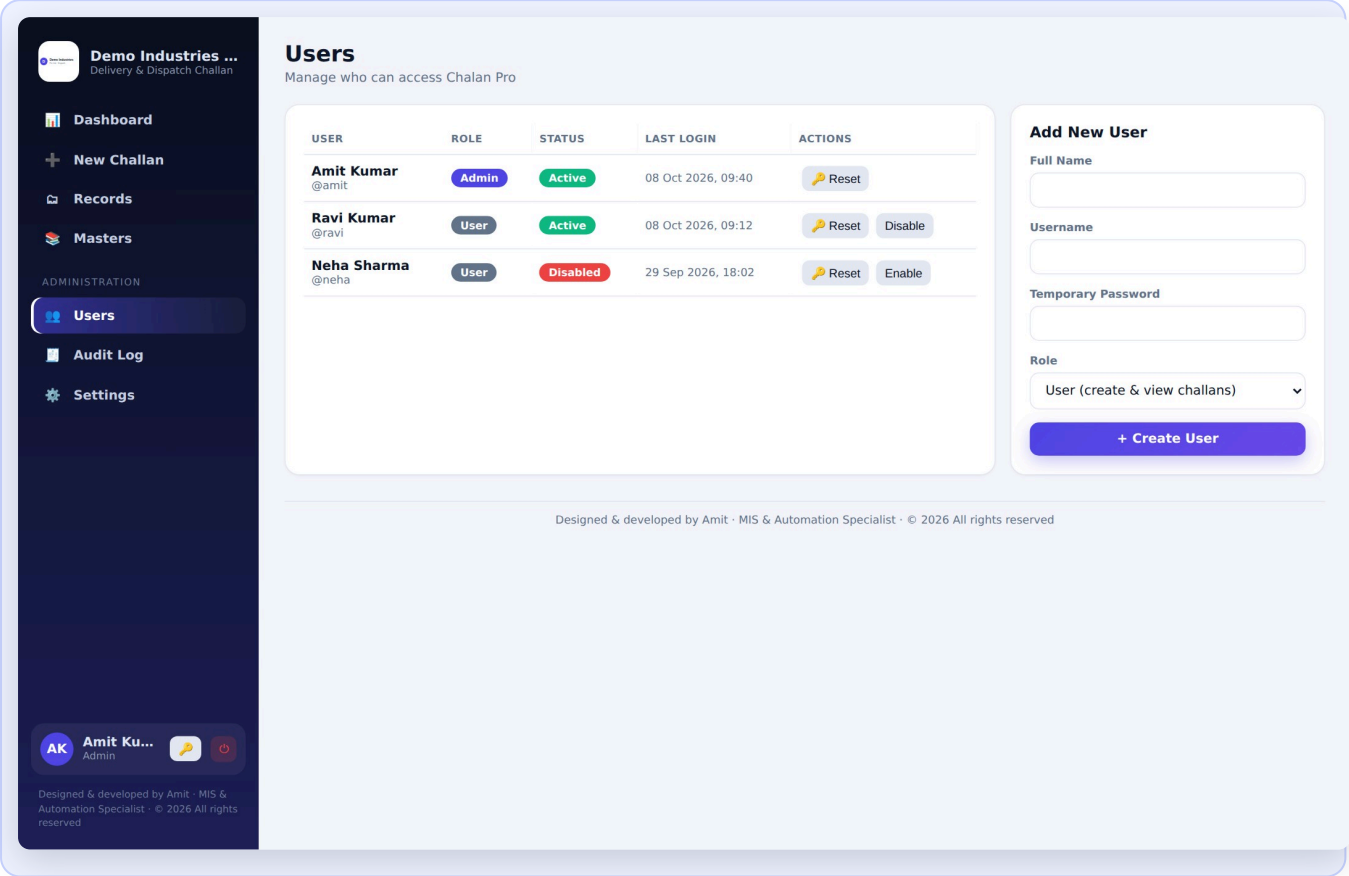

BUSINESS VALUE — The client can brand the system themselves without developer help.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 14

Users and roles

Admins add users, set their role, enable or disable accounts, and reset passwords. Users can change their own password.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Two roles: Admin (full access) and User (daily work).
- Disabled users cannot sign in, but their history stays intact.
- Admin cannot disable their own account by mistake.

HOW TO USE IT

1. Enter name, username, temporary password and role.
2. Click Create User and share the details.
3. Disable or reset passwords whenever needed.

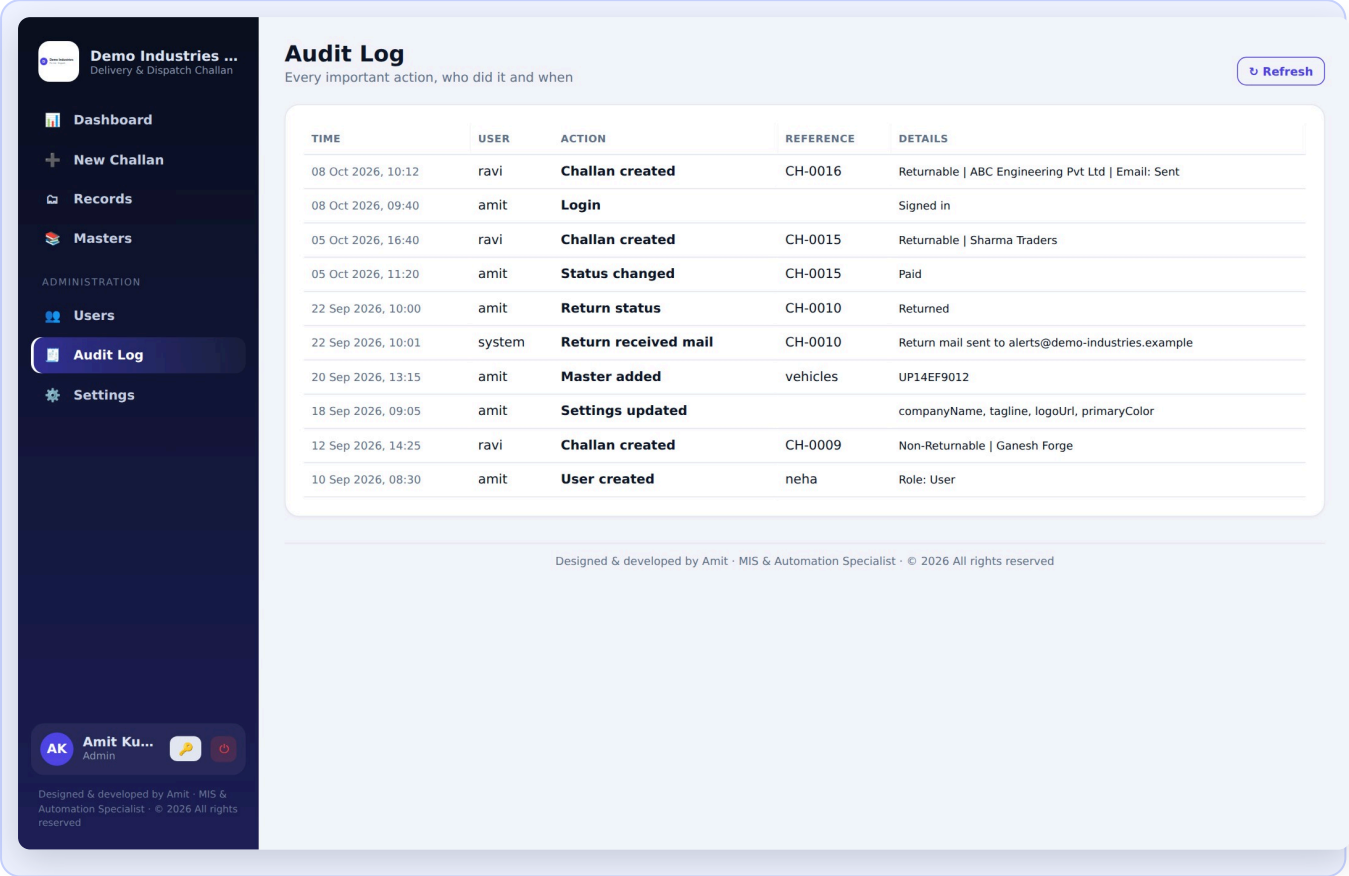

BUSINESS VALUE Access is controlled and easy to review.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 15

Audit log

Every important action is recorded with the user and time: logins, challans, status and return changes, mails, master edits, user actions and settings changes.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Newest first, up to 300 entries shown.
- Shows what was changed, not just that something changed.
- Helps with internal control and dispute resolution.

HOW TO USE IT

1. Read the list from newest to oldest.
2. Check who did the action and when.
3. Refresh to see the latest activity.

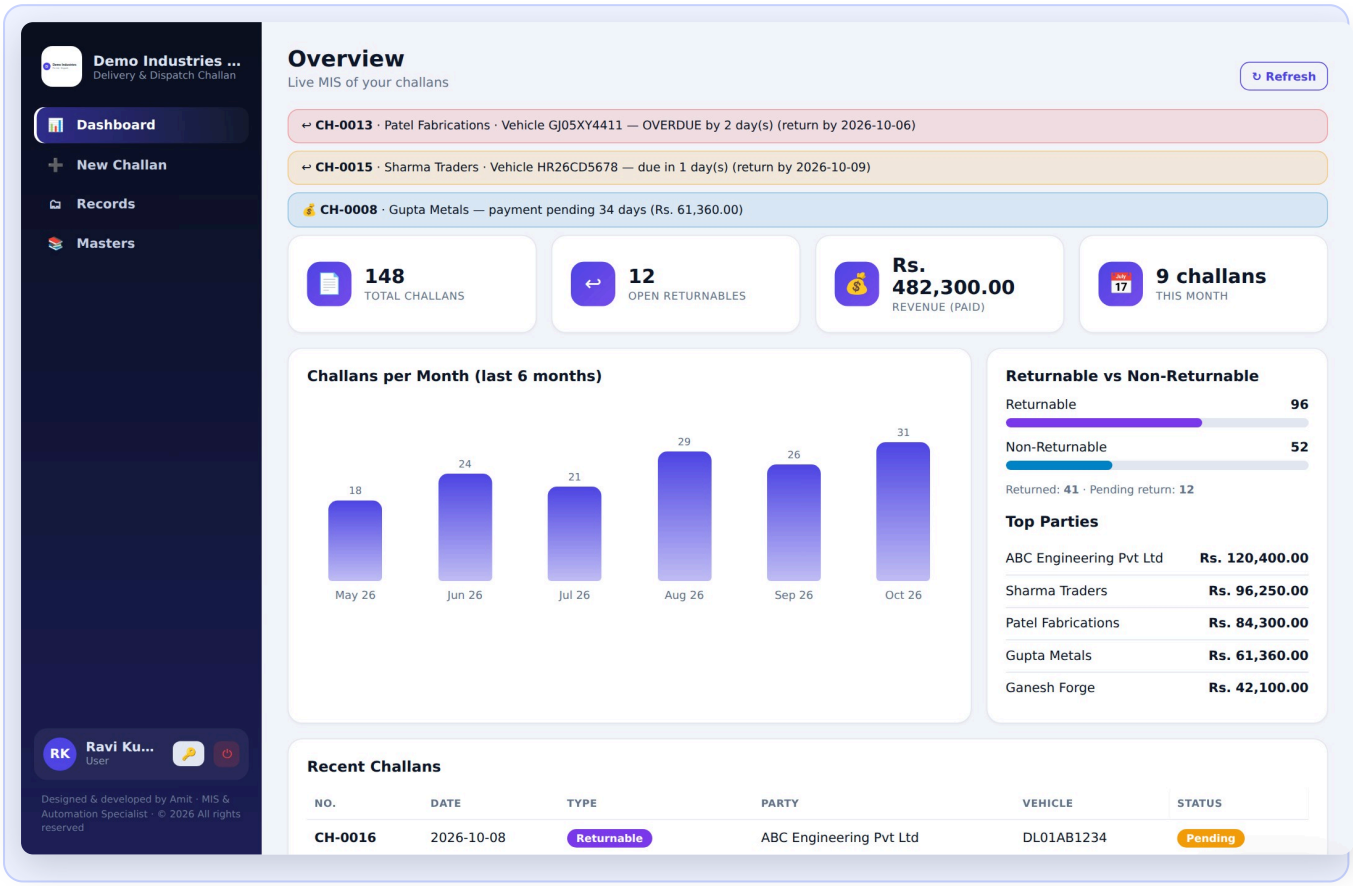

BUSINESS VALUE Full accountability for every change made in the system.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 16

Role-based view

A normal user sees only their work screens. Users, Audit Log and Settings are hidden from their sidebar, and the server also blocks those actions.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- Sidebar adapts to the signed-in role.
- Hidden does not mean unprotected: every admin action is checked on the server.
- Same app, same data, different permissions.

HOW TO USE IT

1. A User signs in with their own account.
2. Daily screens are available as normal.
3. Admin-only menus stay hidden and blocked.

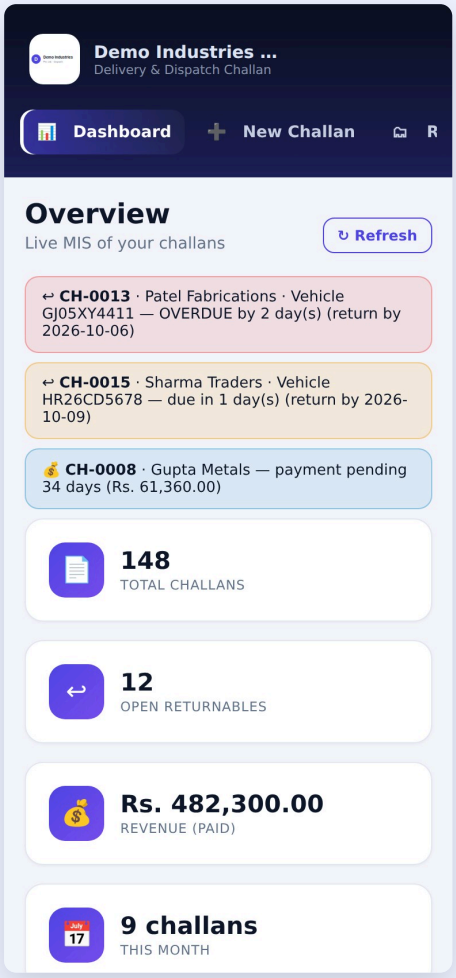

BUSINESS VALUE Staff get a simple screen. Owners keep control.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

SECTION 17

Works on mobile

The same system opens in any phone browser. The layout adapts, the menu becomes a scrolling bar, and the dashboard stays readable.

Screen from the Chalan Pro application (sample data)

KEY FEATURES

- No app to install and no app store needed.
- Dispatch staff can create challans from the gate or the warehouse.
- Same security and audit trail on mobile.

HOW TO USE IT

1. Open the link in the phone browser.
2. Add it to the home screen for quick access.
3. Use the scrolling menu bar at the top.

BUSINESS VALUE Dispatch and management work from wherever they are.

TECHNOLOGY & DEPLOYMENT

How it is delivered

Component	Details
Data storage	Google Sheets owned by the client. Data can be opened, backed up or exported at any time.
Application	Google Apps Script web app. Works in any browser on phone, tablet or PC. Nothing to install.
Hosting cost	No hosting charge on Google's free tier for normal small-business volumes. Email is sent from the client's Google account.
Security	Hashed passwords, Admin and User roles, server-side permission checks, session expiry and a full audit trail.
Set-up time	Typically 1 to 2 working days, including masters entry from the client's lists and one training session.
Email limits	About 100 mails per day on a standard Gmail account, about 1,500 per day on Google Workspace.

WHAT THE CLIENT PROVIDES

- A Google account for the business (Google Workspace recommended for higher mail limits).
- Logo as a public image link, company details, GSTIN, tax percentage and number format.
- Existing lists of parties, transporters, drivers, vehicles and items for the one-time masters import.

OPTIONAL NEXT STEPS

- Client login portal, so each customer sees only their own challans and returns.
- WhatsApp sending of challan PDFs and return reminders.
- Link with the CRM Pro module for party and follow-up data; GST invoice generation from delivered challans.

© 2026 Amit · MIS & Automation Specialist · All rights reserved

TERMS & COPYRIGHT

Licence, support and copyright

LICENCE

- The client receives a non-exclusive, non-transferable licence to use Chalan Pro for their own business.
- The source code remains the property of the developer and is not sold or shared as part of the licence.
- The client may not copy, rebrand, resell or sub-license the software without written permission.
- All client data (Google Sheet, challans, parties, masters) remains fully owned by the client.

SUPPORT

- Bug fixes for the delivered version are included during the support period.
- New features, changed business rules and new reports are charged as customisation.
- Changes made by Google to Apps Script or Gmail limits are outside the developer's control.
