PRODUCT GUIDE & PRICE LIST

IMS

Inventory Management System

Record every issue and receipt, watch live stock and see Dead, Slow and Regular moving items at a glance. Built on Google Sheets + Apps Script, so it runs on your own Google account with no software to install.

1. Deploy Form

Multi-item Issue / Received entry

2. Dashboard

Universal search and date-range totals

3. MIS Report

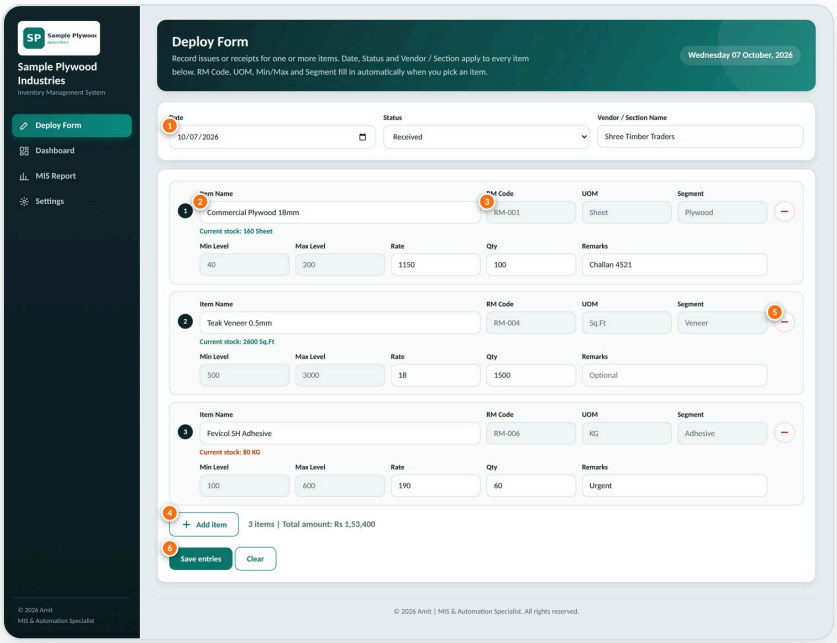

Stock levels, ageing and charts

Prepared by **Amit** | MIS & Automation Specialist

October 2026

1 Deploy Form

Enter many items in one go. Everything fills in automatically from your Master Item sheet.

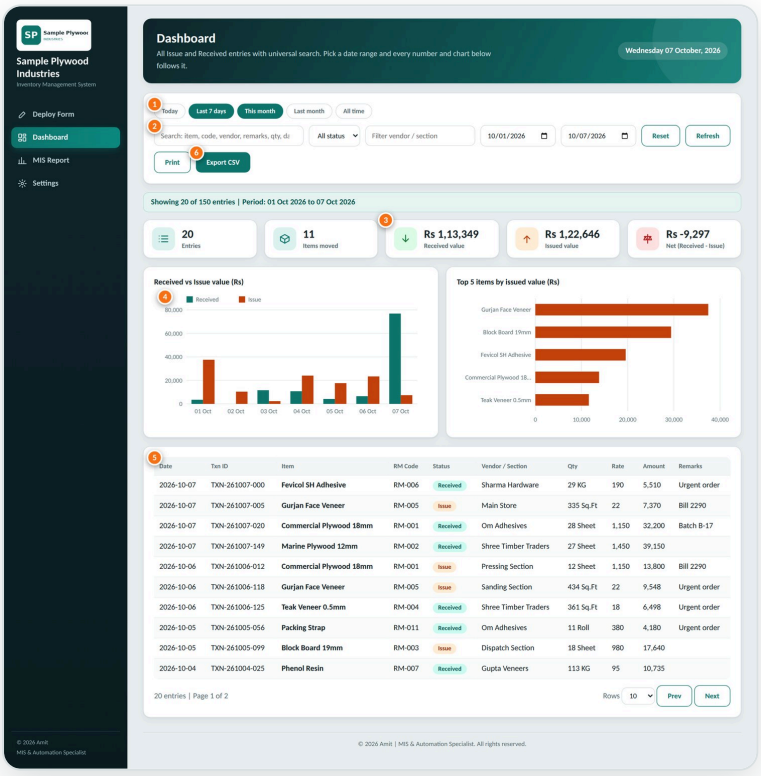

1. **Date, Status, Vendor / Section** are set once for the whole batch. Vendor is a searchable list.
2. **Type to search** the item name; the list narrows as you type.
3. **Auto-filled:** RM Code, UOM, Segment, Min and Max come from Master Item.
4. **+ Add item** adds another row, so many items save together.
5. **–** removes a row you do not need.
6. **Save entries** saves all rows at once. If one row is wrong (for example, not enough stock), nothing is saved.

Stock check on Issue **Live total amount**

2 Dashboard

All Issue and Received entries. Pick a date range and every number and chart follows it.

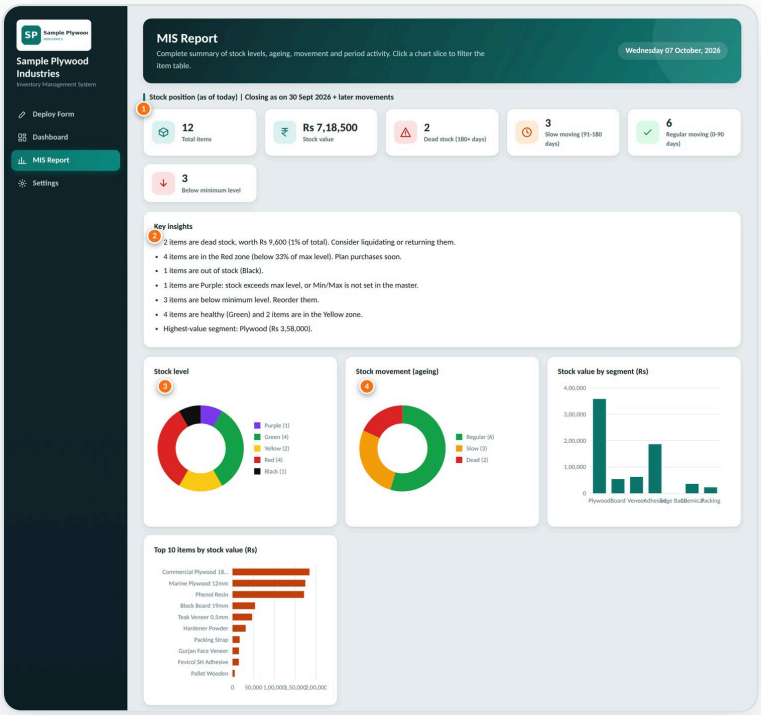

1. **Quick date chips:** Today, Last 7 days, This month, Last month, All time.
2. **Universal search** over item, code, vendor, remarks, qty, date and Txn ID, plus status, vendor and date filters.
3. **KPI cards follow your filters,** so the amounts match the period you selected.
4. **Received vs Issue chart** by day, or by month for long ranges.
5. **Click a column heading to sort.** The header stays frozen while you scroll.
6. **Export CSV** or **Print** the filtered rows.

Top 5 issued items **Rows per page**

3 MIS Report

Where your stock stands today, what is not moving, and what to reorder.

Stock position

1. **KPI cards:** total items, stock value, Dead / Slow / Regular counts and items below minimum.
2. **Key insights** are written automatically, with value at risk and reorder hints.
3. **Stock level chart.** Click a slice to filter the item table below.
4. **Movement chart** (Regular, Slow, Dead). Click a slice to filter too.

Period activity and item-wise stock

1. **Period chips** and a date range for the activity section.
2. **Received, Issued, Net and entries** for that period only.
3. **Filter** by level, movement, segment or Below minimum.
4. **Colored level badge** and fill bar for every item.
5. **Reorder Qty** shows how much to buy to reach the Max level.
6. **Print** a branded report or **export CSV**.

Quick start in 5 steps

1. Create a Google Sheet and open **Extensions → Apps Script**.
2. Paste **Code.gs**, then add an HTML file named **Index** and paste Index.html.
3. Fill **Master Item**, **Vendor List** and the closing date in **L1**.
4. **Deploy → New deployment → Web app**, then open the link.
5. Start entries in **Deploy Form**. Dashboard and MIS update by themselves.

Google Sheet structure

Sheet	Columns	Purpose
Master Item	A Item Name, B RM Code, C UOM, D Min, E Max, F Segment, G Opening Stock. Cell L1: closing date.	Item master and opening stock
Vendor List	Column B: Vendor / Section Name	Searchable dropdown
Transactions	Created automatically	Every Issue / Received entry
Settings	Created automatically	Company name and logo

Stock level colors

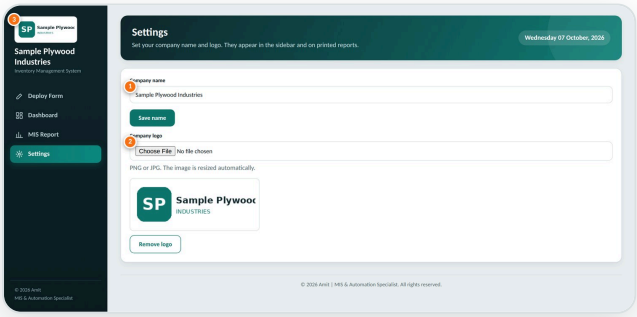

Color	Meaning (stock vs Max level)
Black	Stock is 0
Red	Up to 33%
Yellow	34% to 66%
Green	67% to 100%
Purple	Above Max, or Max not set

Movement (ageing) rules

Type	Days since last issue
Regular	0 to 90 days
Slow	91 to 180 days
Dead	More than 180 days

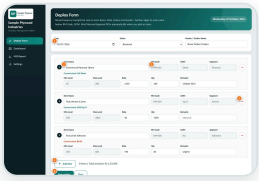

Stock = Opening stock (closing as on the L1 date) + Received − Issue after that date. Limits can be changed in the code.

Settings: company name and logo

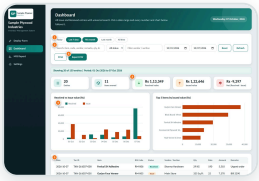

1. **Company name** shown in the sidebar and on printed reports.
2. **Upload a logo** (PNG or JPG). It is resized automatically.
3. **Logo and name** appear in the sidebar and in the print header.

Terms

- Prices are in Indian Rupees and exclude GST.
- 50% advance to start, 50% on delivery.
- Delivery in 3 to 7 working days, depending on the package.
- The system runs on your own Google account. You own the sheet and the code.
- Fixes for any bug found during the support period are free.
- Changes beyond the package are quoted before work starts.
- This price list is valid for 30 days from the date of issue.
- Sample screens use demo data. Your look and fields can be adjusted.

Frequently asked

Do I need to install anything?	No. It opens in the browser from a link, on computer or mobile.
Where is my data stored?	In your own Google Sheet, in the Transactions sheet.
Can two people enter at the same time?	Yes. Entries are queued safely so nothing is overwritten.
Can I add my logo?	Yes, from Settings. It also appears on printed reports.
What if my items change?	Add them in the Master Item sheet. They show up in the form straight away.

Ready to start?
Tell us your package and we will set up IMS on your Google account.
