OVERVIEW

What this system does

HR Payroll is a complete HR and payroll system for small and medium companies. It replaces spreadsheets, manual salary calculation and scattered WhatsApp messages with one organised system that runs on Google Sheets and Apps Script.

PROBLEMS IT SOLVES

- Attendance is recorded on paper, in Excel or inside the punch machine, and nobody can see it in one place.
- Salary is calculated by hand every month, which causes mistakes, delays and disputes.
- Leave requests come through phone and WhatsApp, and approvals are forgotten.
- Staff ask HR for payslips and attendance details again and again.
- Management waits days for a monthly report that is already out of date.

HOW IT WORKS

- HR enters or imports attendance (daily entry or punch machine file).
- Leave requests come in from HR or from the employee portal, and are approved in one click.
- Salary is calculated automatically from attendance, leave and the salary rules.
- Payslips and reports are emailed as PDF. MIS reports are available any time.
- Every action is saved in an activity log for accountability.

WHO GETS WHAT

User	What they can do
Admin	Everything, including settings, users, branding and the activity log
HR	All staff, attendance, punch import, leave approvals, salary, MIS and mail
Employee	Own attendance calendar, own leave requests, own salary and payslip, password change

CONTENTS

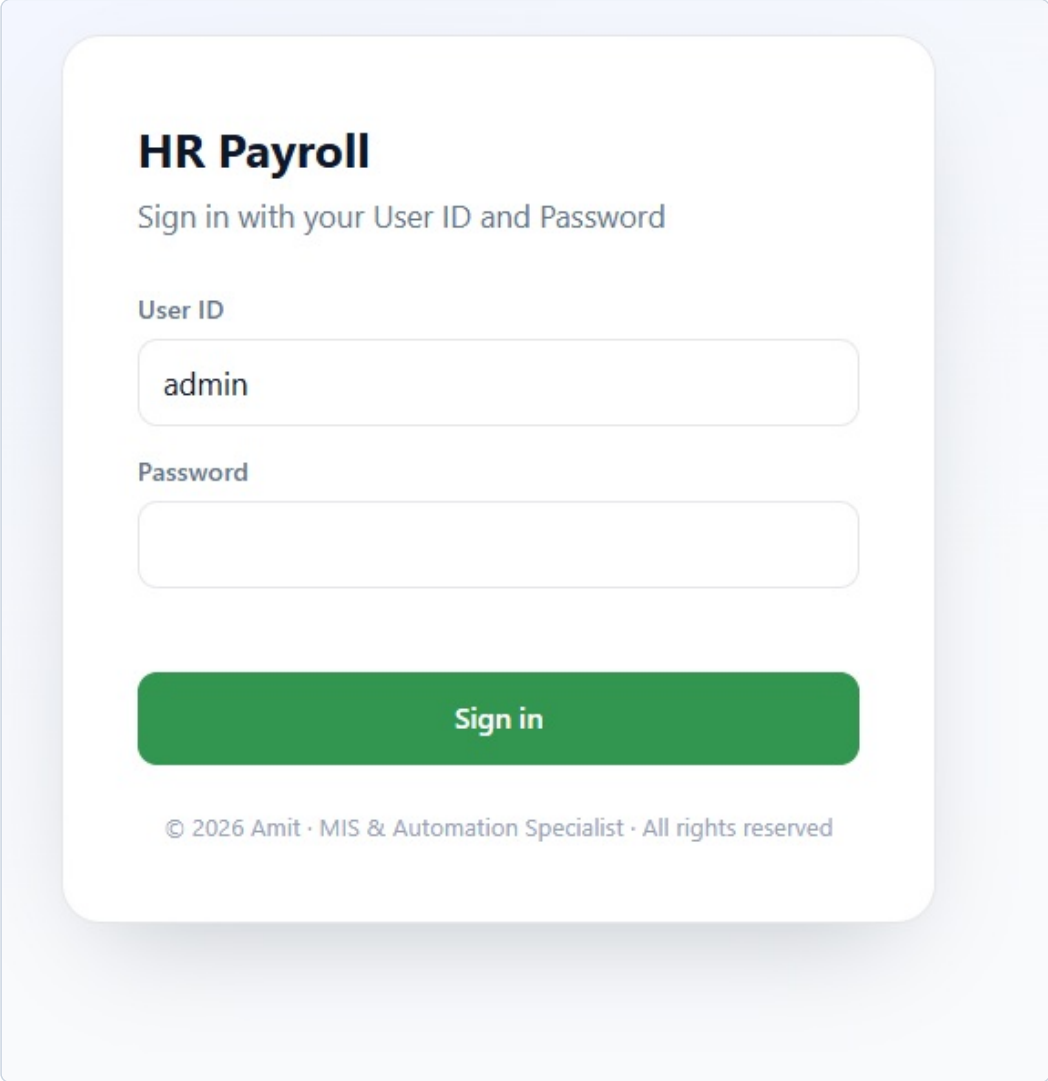

Modules included

No.	Module
01	Login & Access Roles
02	Dashboard
03	Employee Management
04	Attendance (Daily Entry & Monthly Grid)
05	Punch Machine Import
06	Leave Management
07	Salary & Payslips
08	MIS Reports
09	Mail Center & Automatic Emails
10	Settings, Branding & Activity Log
11	Employee Self-Service Portal

Note: The preview images in this brochure are illustrative layouts of each module. They show the structure and colour scheme of the real screens.

MODULE 01

01 Login & Access Roles

Every user signs in with a User ID and Password. What they see depends on their role, so each person gets only the information they need.

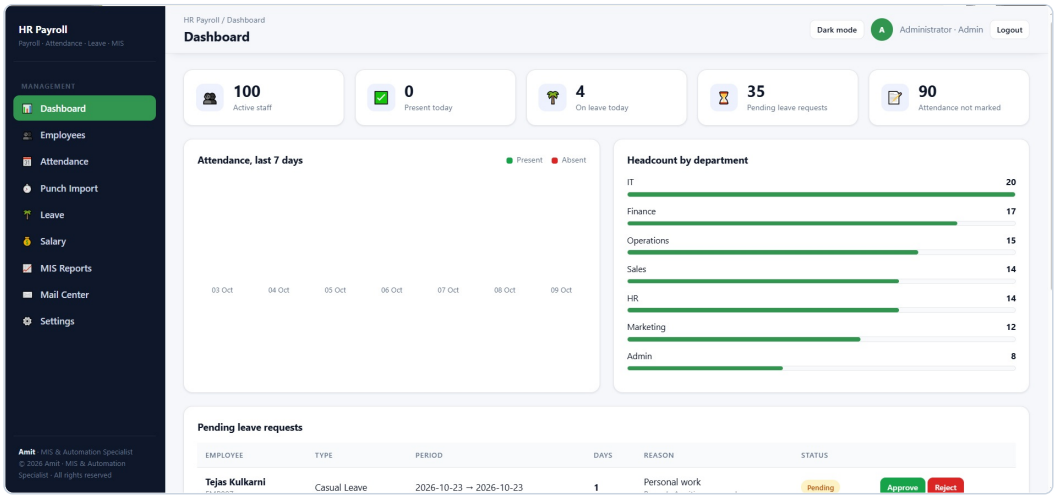

KEY FEATURES

- Secure sign-in with hashed passwords (SHA-256)
- Three roles: Admin, HR and Employee
- Session timeout and safe logout
- Forgot-password handled by Admin reset
- Every login and logout is recorded

Who uses it: Everyone (Admin, HR, Employee)

MODULE 02

02 Dashboard

A one-screen summary of today. HR sees headcount, who is present, who is on leave, pending requests and attendance gaps at a glance.

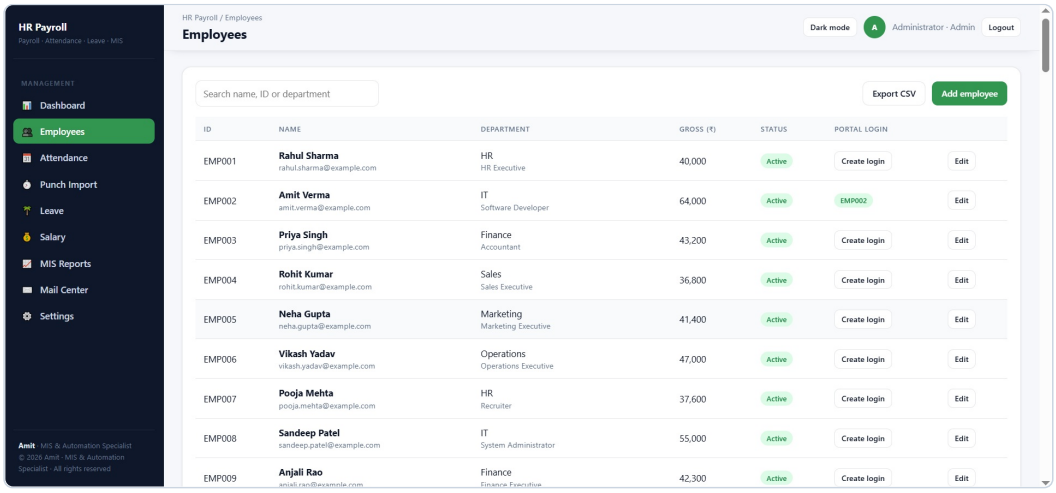

KEY FEATURES

- Live counts: active staff, present, on leave, pending
- Attendance trend for the last 7 days
- Headcount by department with bars
- Pending leave requests with Approve / Reject
- Attendance not marked alert for today

Who uses it: Admin, HR

MODULE 03

03 Employee Management

Central employee master with salary structure, contact details and status. Employees can be searched, edited and exported.

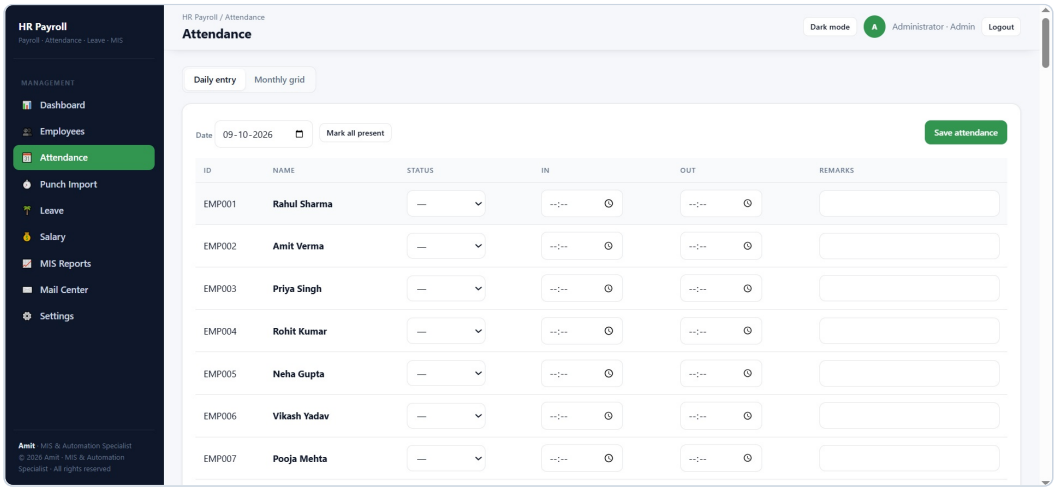

KEY FEATURES

- Auto Employee ID (EMP0001, EMP0002...)
- Basic, HRA and other allowances stored per employee
- Active / Inactive status
- Search by name, ID or department
- One-click CSV export
- Create a portal login directly from the employee row

Who uses it: Admin, HR

MODULE 04

04 Attendance (Daily Entry & Monthly Grid)

Mark attendance for each day with Present, Absent, Half Day, Paid Leave and Holiday. The monthly grid shows the full picture for every employee.

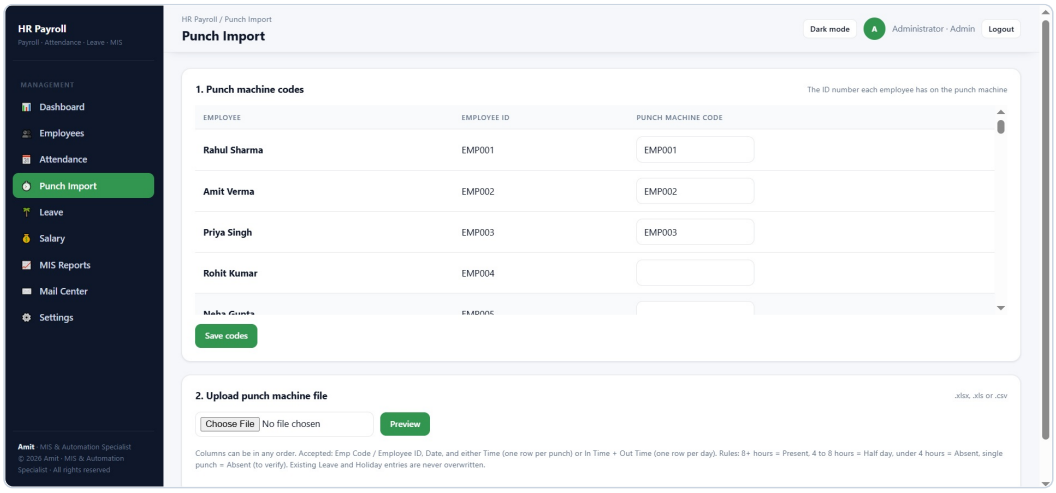

KEY FEATURES

- Daily entry with In / Out time and remarks
- Mark all present in one click
- Monthly grid: employees by days, colour coded
- Totals for P, A and L per employee
- Sundays paid automatically in payroll when not marked

Who uses it: HR (daily), Admin, HR (review)

MODULE 05

05 Punch Machine Import

Upload the Excel or CSV file from your biometric / punch machine. The system matches employees, works out hours and status, and shows a preview before saving anything.

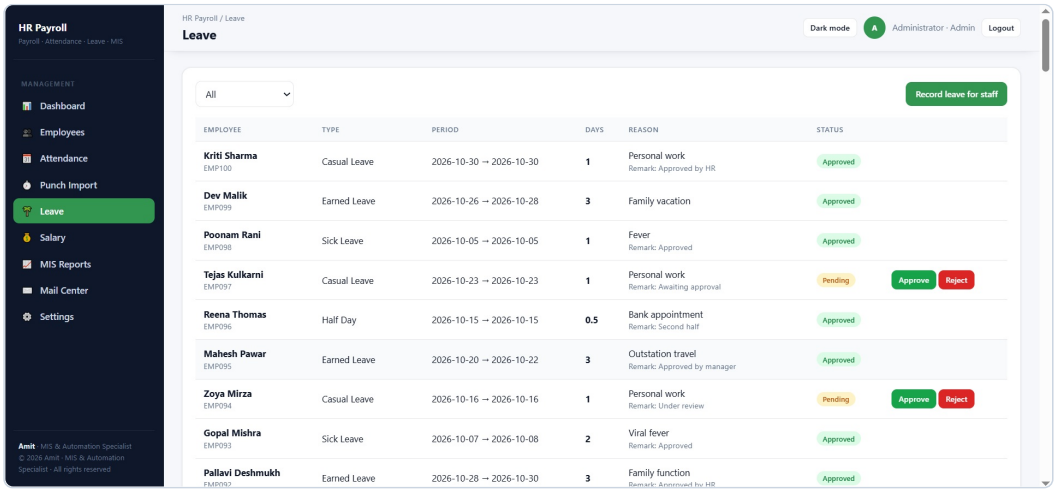

KEY FEATURES

- Accepts .xlsx, .xls and .csv files
- Employees matched by punch machine code
- Multiple punches per day handled automatically
- Status by hours: Full day, Half day or Absent (rules are configurable)
- Preview and review before saving
- Existing Leave and Holiday entries are never overwritten

Who uses it: HR, Admin

MODULE 06

06 Leave Management

Leave requests from HR or from employees themselves, with approval and automatic email updates. Leave balance is tracked for the year.

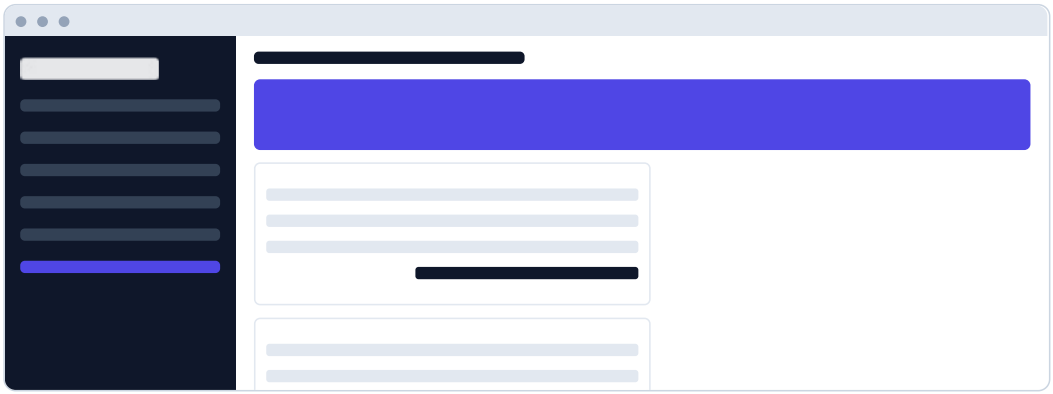

KEY FEATURES

- Leave types: Casual, Sick, Earned and Unpaid
- Employees apply from their own portal
- Approve or reject with an optional remark
- Email to employee on apply, approve and reject
- Alert email to HR for every new request
- Annual leave balance per employee

Who uses it: Employee (apply), HR / Admin (approve)

MODULE 07

07 Salary & Payslips

Layout preview. Real screenshot will be added after the module is captured.

Salary is calculated from the attendance record. Loss of pay, PF, ESI and professional tax are applied automatically. Payslips are emailed as PDF.

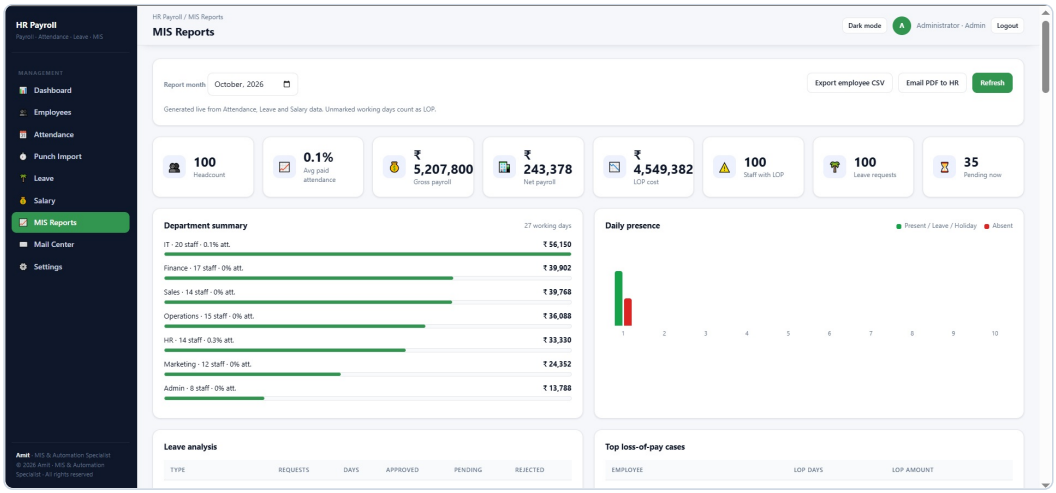

KEY FEATURES

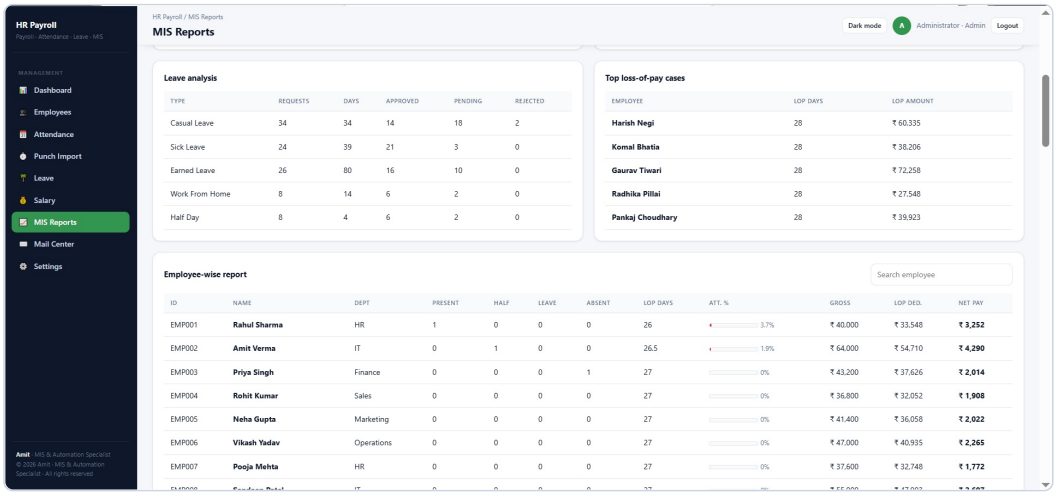

- Gross salary: Basic + HRA + allowances
- Loss of pay (LOP) based on absent and unmarked days
- PF on basic, ESI within limit, Professional Tax
- Net pay and total payroll for the month
- Salary generated and saved per month
- PDF payslip sent by email, one at a time or to all staff
- CSV export for the accounts team

Who uses it: HR, Admin (process). Employee (view own).

MODULE 08

08 MIS Reports

Management reports generated live for any month. Use them for review meetings, payroll approval and cost control.

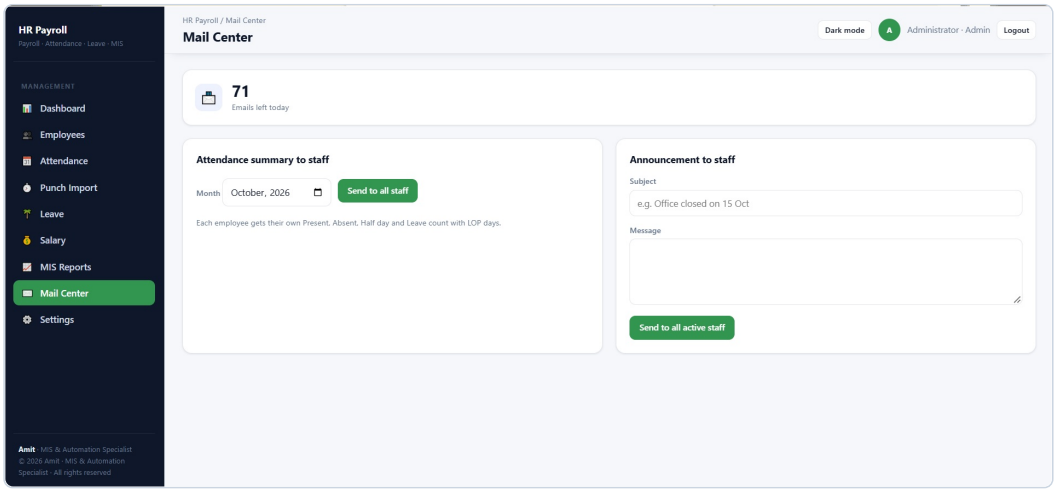

KEY FEATURES

- KPI cards: headcount, attendance %, gross and net payroll, LOP cost
- Department-wise cost and attendance summary
- Daily presence chart for the month
- Leave analysis by type and status
- Top loss-of-pay cases
- Employee-wise report with search and CSV export
- Full MIS PDF emailed to HR

Who uses it: Admin, HR

MODULE 09

09 Mail Center & Automatic Emails

Staff receive the right emails at the right time without manual work. HR can also send announcements to all active staff from one place.

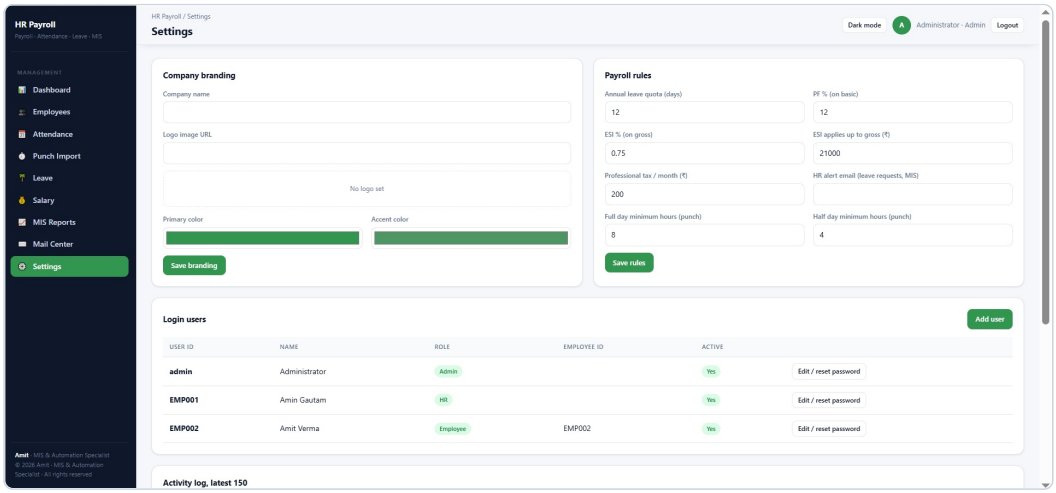

KEY FEATURES

- Attendance summary to each employee
- Announcement to all active staff
- Automatic emails for leave events and payslips (listed on the next page)
- Remaining daily email quota shown before sending
- Every mail send is recorded in the activity log

Who uses it: HR, Admin

MODULE 10

10 Settings, Branding & Activity Log

Customise the system for your company and control who can do what. A full activity log keeps every important action on record.

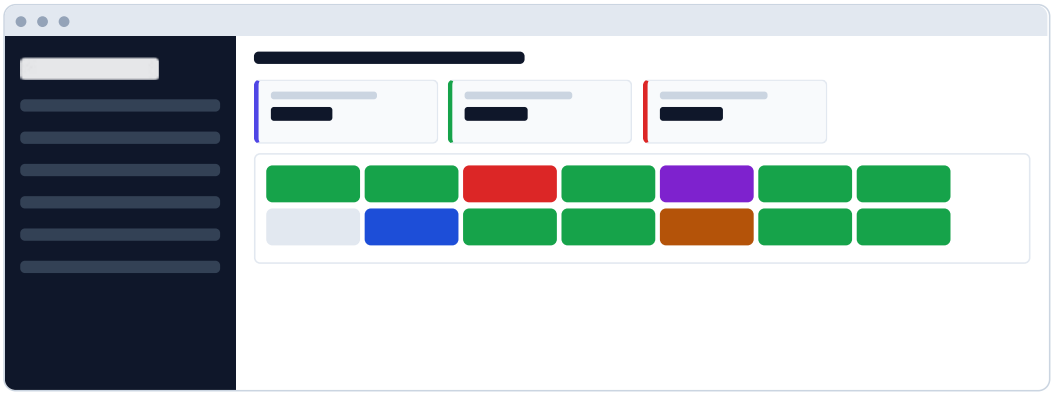

KEY FEATURES

- Company name, logo and brand colours
- Payroll rules: leave quota, PF, ESI, Professional Tax
- Punch rules: full day and half day hours
- HR alert email address
- User management: add users, set role, reset password
- Activity log of the last 150 actions

Who uses it: Admin only

MODULE 11

11 Employee Self-Service Portal

Layout preview. Real screenshot will be added after the module is captured.

Each employee has a private login. They can see only their own information and take care of routine requests themselves, which saves HR time.

KEY FEATURES

- Home: present days, absent days, leave balance and pending requests
- Monthly attendance calendar with colour-coded days
- Apply for leave and track its status
- Salary breakdown and "email me my payslip"
- Change own password

Who uses it: Employee

MODULE 09 · DETAIL

Automatic emails

Each email uses the company logo and colours, and includes the copyright footer. Staff do not need to ask HR for information they can receive automatically.

Email	Sent to	When
Leave request received	Employee	Immediately after applying
New leave request	HR / Admin alert address	Immediately after applying
Leave approved	Employee	When HR approves, with HR note if any
Leave request not approved	Employee	When HR rejects, with reason
Payslip for the month	Employee (PDF attached)	When payslip is mailed
Attendance summary	Each employee	When HR sends the monthly summary
MIS report (PDF)	HR / Admin alert address	When HR sends the MIS report
Announcement	All active staff	When HR sends an announcement
Payslip requested	Employee (self-service)	When employee requests own payslip

Reminders included: pending leave count for HR, and leave starting-soon alerts can be added to any plan on request. Gmail sends a limited number of emails per day, and the Mail Center shows the remaining quota before every send.
