TaskFlow Pro

Task Delegation, Recurring Checklists & MIS Reporting

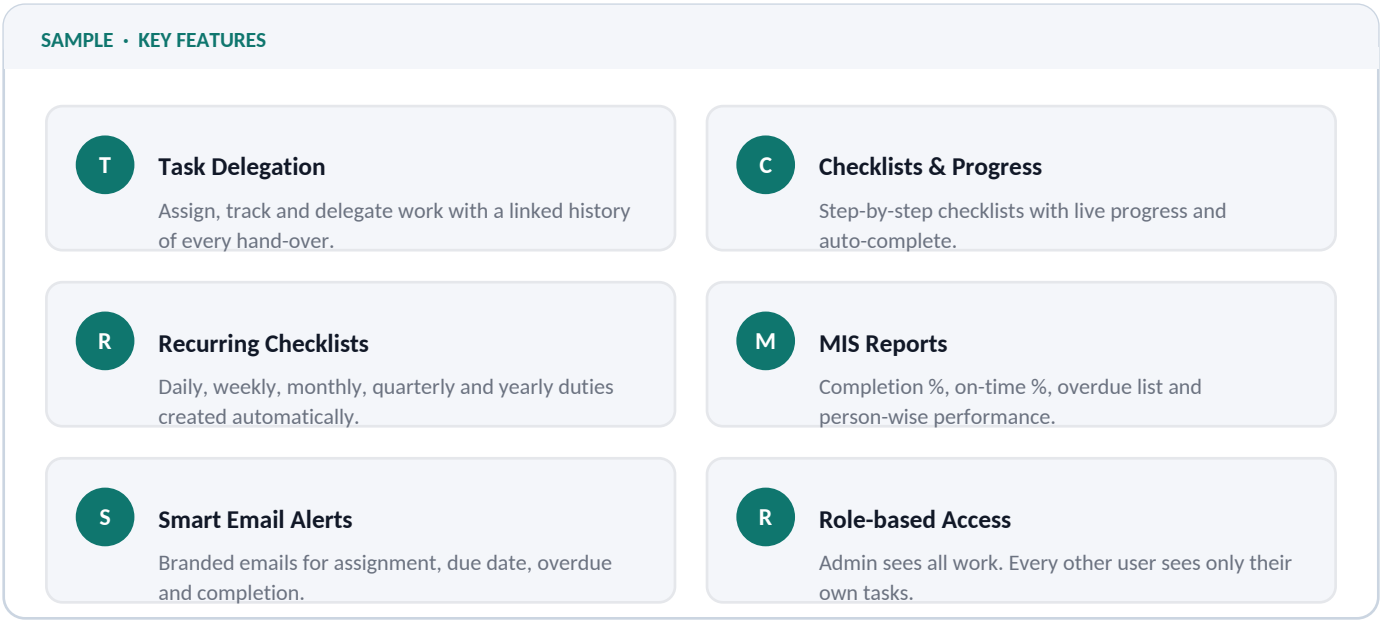

System brief and pricing · October 2026

TaskFlow Pro is a ready-to-use task management system for teams. It helps you assign work, track checklists, automate recurring duties and see performance in MIS reports. It works in any browser, runs on Google Sheets and Google Apps Script with no server to manage, and every alert and screen is in English.

Login	User ID and Password. No Google account needed for users	**Access**	Admin sees all work. Users see only their own tasks
Hosting	Google Sheets + Apps Script. No server cost	**Branding**	Your logo, company name and theme colour from Settings

1. Key Features

The main modules of the system, shown as a quick overview.

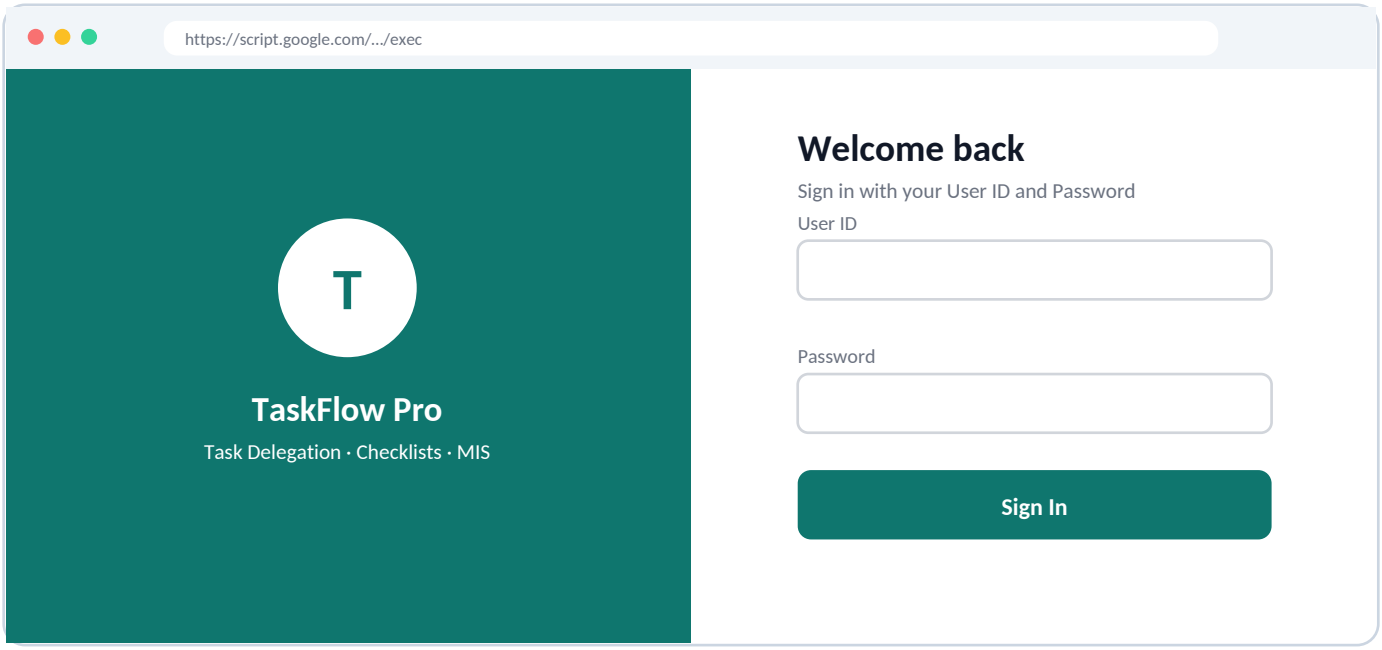

Key features of TaskFlow Pro

2. Login and Access

Users sign in with a User ID and Password. Access depends on the role assigned by the Admin. The Admin manages users, settings and reports, and an Employee works only on tasks linked to them.

Login page with company logo, name and theme colour

3. Roles and Permissions

Two roles keep the system simple. Admin has full control. Employee works with their own tasks and can assign work to others if the Admin allows it.

SAMPLE · ROLES AND PERMISSIONS

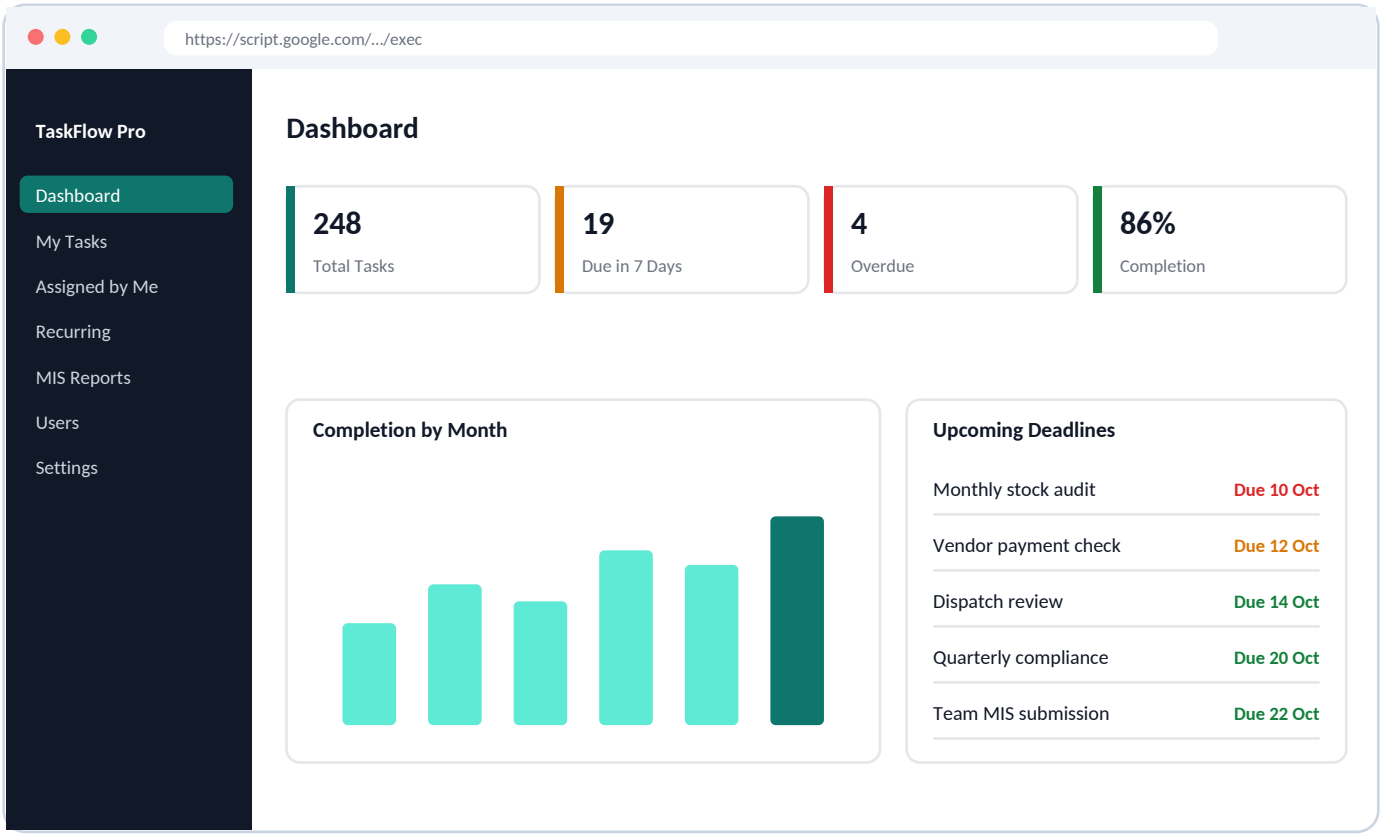

CAPABILITY	ADMIN	EMPLOYEE
View all tasks in the system	✓	-
View own assigned and assigned-by-me tasks	✓	✓
Assign tasks and create recurring checklists	✓	✓
Update checklist items and task status	✓	✓
Delegate a task to another user	✓	✓
Manage users and reset passwords	✓	-
Change company branding and settings	✓	-
Export MIS report to Google Sheet	✓	-

Role-wise permissions

4. Dashboard

The dashboard shows total, open, completed and overdue tasks, a completion chart and upcoming deadlines. Each user sees figures for their own work.

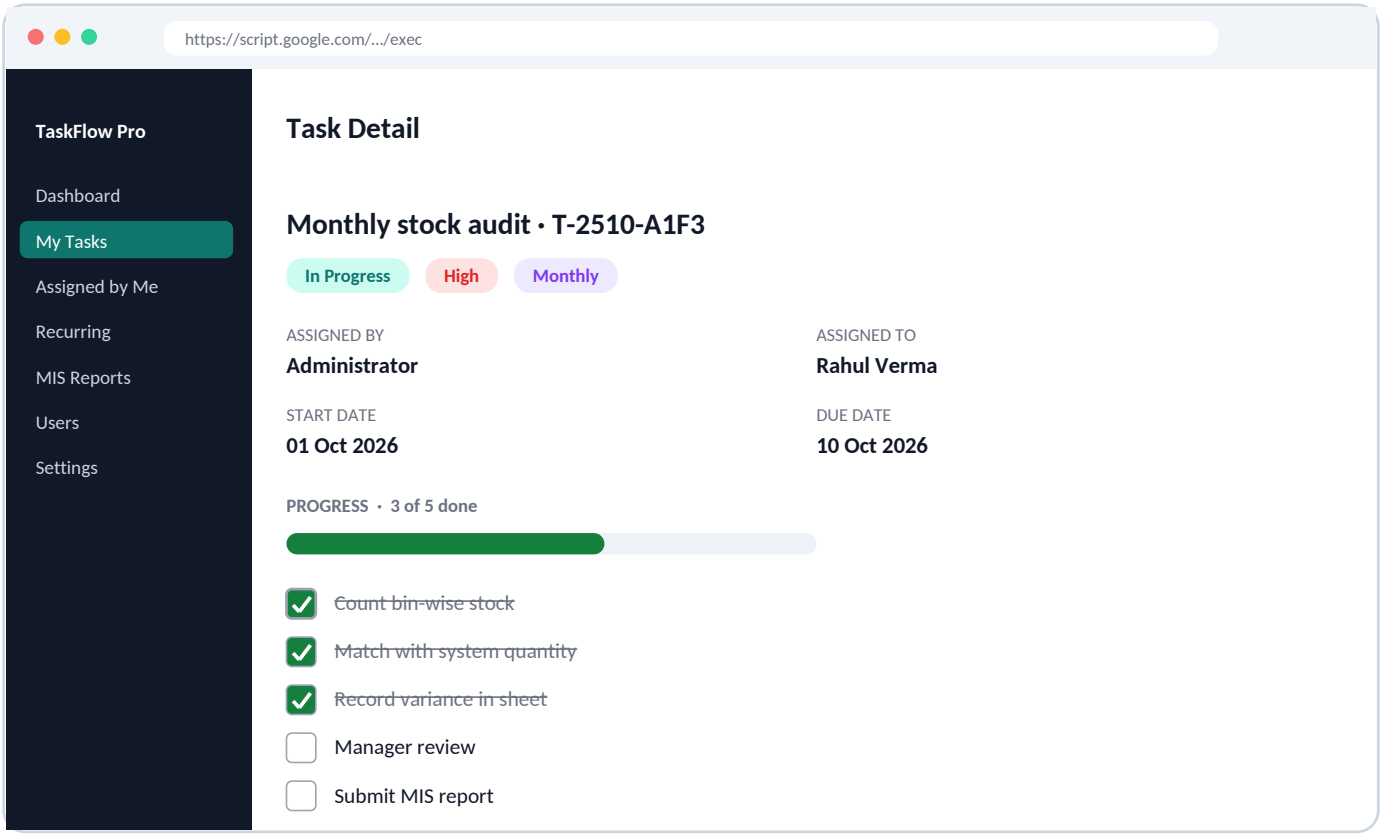

Dashboard with KPIs, completion chart and upcoming deadlines

5. Task Management and Delegation

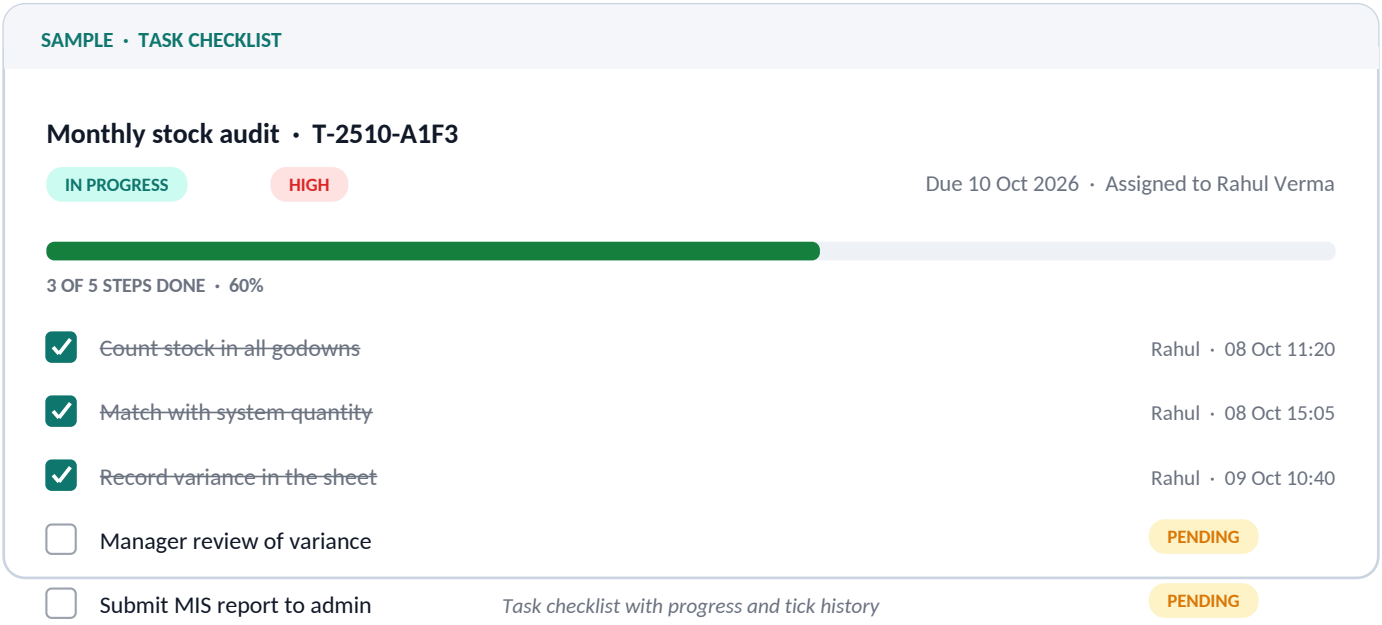

Every task has a title, priority, category, start and due date, reference link and comments. An assignee can delegate a task to another user. The new task stays linked to the original.

Task detail with checklist, progress, delegation and activity log

6. Checklists

A task can have a checklist. Each step shows who ticked it and when. Progress updates automatically, and the task completes when every step is done.

Task checklist with progress and tick history

7. Recurring Checklists

Set a checklist once and choose daily, weekly, monthly, quarterly or yearly. The system creates each task with the right due date. You can pause a schedule and resume it later without missed periods being created.

SAMPLE · RECURRING SCHEDULE

FREQUENCY

Daily | Weekly | **Monthly** | Quarterly | Yearly

PERIOD	DUE DATE	ASSIGNED TO	STATUS
Oct 2026	05 Oct 2026	Rahul Verma	DONE
Nov 2026	05 Nov 2026	Rahul Verma	PENDING
Dec 2026	05 Dec 2026	Rahul Verma	SCHEDULED
Jan 2027	05 Jan 2027	Rahul Verma	SCHEDULED

Recurring checklist schedule with status

8. Email Alerts

Users receive clear emails for new tasks, due-soon reminders, overdue tasks and delegation. The person who assigned a task receives the completion email. A daily digest lists each user's open work.

11. Implementation

Most teams go live in about three weeks. The client supplies the company details, the user list and any existing data. We handle setup, branding, training and go-live.

Typical three-week implementation

12. Pricing Plans

Choose the plan that matches your number of users. Each plan includes every module. Prices are in Indian Rupees and exclude GST at 18%.

STARTER For small teams	BUSINESS Most popular	ENTERPRISE For growing companies

Training session	Live online or on-site session of 2 hours for users or admins	Rs. 2,500 per session
Priority support	24 hour response and a monthly review call	Rs. 6,000 per year

Notes

- Prices are in Indian Rupees and exclude GST at 18%.
- Licence and setup are one-time. Annual support is optional and recommended.
- The system runs on Google Sheets and Google Apps Script, so there is no server hosting fee.
- Google usage quotas and mail limits apply to the Google account used by the client.
- Customised modules and integrations are priced after requirement study.
